Internationalisation and Economic Institutions Mark Thatcher, 2007-07-19 This book examines when how and why internationalisation affects national economic institutions It confronts questions at the heart of debates in political economy and comparative politics What does internationalisation of markets mean Who are its carriers in domestic arenas Through which mechanisms does it affect decisions about national institutional reform What are institutional outcomes in the face of internationalisation The book responds to its questions by

looking at key economic institutions in five strategic sectors securities trading telecommunications electricity airlines and postal services It compares across four countries that represent different varieties of capitalism namely Britain France Germany and Italy over the period between 1965 and 2005 Thus it combines cross national historical and cross sectoral comparisons The author distinguishes technological and economic forms of internationalisation from policy forms notably decisions in powerful overseas nations and supranational regulation He argues that contrary to expectations the first was met with institutional inertia In contrast policy forms of internationalisation namely reforms in the US and European Union regulation played significant roles in undermining long standing national institutions The book explores the mechanisms whereby policy forms of internationalisation were influential by looking at the strategies coalitions and resources of key actors in national arenas It also shows that institutional outcomes were surprising all four countries albeit through different routes adopted increasingly similar reforms of economic institutions privatisation the ending of monopolies and delegation to independent regulatory agencies The book rejects the view that technological and economic forms of internationalisation drive institutional change It suggests that policy forms of internationalisation are more important because they become part of domestic decision making and aid the reform of well established national institutions

Clegg,2002-06-07 Paradox the

simultaneous existence of two inconsistent states has become orthodox The orthodox is now the paradox The orthodox world of ordering controlling and organizing is increasingly opposed to a normalizing world of disordering disrupting and disorganizing And organization studies cannot avoid changing its conceptions of reality as that reality changes In the future organization studies will be the study of paradox how to understand it how to use it In this book of original contributions

addressed to management and organization paradoxes the authors address the new state of the field in terms of representations representing paradoxes and materialisations materialising paradoxes The themes although varied ranging from dialectics to internal tensions from collaborations to ethics and value conflicts from resistant labourers and wharfies to cartoon characters such as The Simpsons from the irrationalities of finance to the psychoanalytic rationalities of auditing and from issues of governance in Asian and international business to the composition of the new knowledge work force in the business professions cohere around core aspects of paradoxicality Overall the contributions to Management and Organization Paradoxes are diverse and challenging Each contribution takes a different angle on the central theme All of the chapters illuminate diverse aspects of contemporary paradoxes in management and organization theory The book provides in each of its chapters a challenge to the still overwhelmingly rationalist views of theory and practice that dominate the field and provides new directions for understanding organizations and management The contributors are drawn from leading

European Australian and Latin American contributors International Contracts and National Economic Regulation:Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri,2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract

The Internationalisation Strategies of Small-country Firms Howard Dick,David Merrett,2007-01-01 This research project combines contemporary and historical analysis to trace the evolution of Australian multinationals It provides unique insights into how firms from a small economy achieved global competitiveness in their niche markets while examining the barriers that inhibited others The evidence is presented in comparative industry and firm case studies and tells the story of

international business made in Australia The longitudinal and multi level analysis in this research provides new insights that challenge the predominance of cross sectional analytical framework dominating strategic management Any scholars sincerely interested how companies from small countries can succeed on the global stage ought to read this book Klaus E Meyer University of Reading Business School UK The international business literature often struggles to depict a universal experience of internationalisation from the perspective of large countries This book seeks to enrich the literature by providing a nuanced overview of the little known Australian experience being an atypical case of a small to medium sized economy which liberalised rapidly from the 1980s outside any trading bloc Six data rich survey chapters explore Australia's mixed success in founding its own multinationals The experience of Australian firms is set in historical and comparative perspective including interactions with inward and specifically American FDI Five industry studies next consider why firms in retail wine and professional services were more successful than in financial services and shipping Nine detailed case studies of firms then identify the elements of administrative heritage strategy and learning that have been the key to success or failure The book concludes by outlining what can be learned from Australia's example and presenting implications for future research The Internationalisation Strategies of Small Country Firms will appeal to scholars researchers and postgraduate students in international business and international economics

**Emerging Capital Markets and Globalization** Augusto de la Torre,Sergio Schmukler,2006-10-20 Back in the early 1990s economists and policy makers had high expectations about the prospects for domestic capital market development in emerging economies particularly in Latin America Unfortunately they are now faced with disheartening results Stock and bond markets remain illiquid and segmented Debt is concentrated at the short end of the maturity spectrum and denominated in foreign currency exposing countries to maturity and currency risk Capital markets in Latin America look particularly underdeveloped when considering the many efforts undertaken to improve the macroeconomic environment and to reform the institutions believed to foster capital market development The disappointing performance has made conventional policy recommendations questionable at best Emerging Capital Markets and Globalization analyzes where we stand and where we are heading on capital market development First it takes stock of the state and evolution of Latin American capital markets and related reforms over time and relative to other countries Second it analyzes the factors related to the development of capital markets with particular interest on measuring the impact of reforms And third in light of this analysis it discusses the prospects for capital market development in Latin America and emerging economies and the implications for the reform agenda
