## **The Iq Controversy:**

The IQ Controversy, the Media and Public Policy Mark Snyderman, Stanley Rothman, 1990 Questions about the nature of intelligence and intelligence testing have sparked increasing controversy during the past two decades The widely held view that intelligence is measureable and both genetic endowment and environment are key determinants of intelligence first came under sharp attack during the decade of the 1960s It was asserted that we do not know what intelligence is that we do not know how to measure intelligence and that IQ tests are biased against both minorities and the poor To determine current opinions among the relevant scientific communities on these issues the authors used survey research to sample a broad group of experts in educational and developmental psychology as well as those whose specific expertise is intelligence testing They found that despite the common understanding to the contrary most experts continue to believe that intelligence can be measured and that genetic endowment plays an important role in IQ The central question addressed in this book is why expert opinion and public views toward intelligence and its measurement are so widely divergent The authors conclude that the public s view of the IQ controversy has been shaped by inaccurate media coverage and more importantly by changes in the nature of American liberalism as well as the key role of civil rights issues in American life The increasing influence of new strategic elites in the United States and the changing role of the mass media have profoundly affected the character of scientific information communicated to the general public and how it is communicated

The IQ Controversy , 1993 Examines 13 recent educational psychology textbooks for their exposition of 2 issues in the intelligence quotient controversy the heritability of IQ and cultural bias in IQ tests Compares these accounts to the expert opinion survey on both topics as reported in Snyderman and Rothman s 1988 book The IQ Controversy the Media and Public Policy Explores sociological and political factors which influence textbook content Notes evidence that some educational policy textbook authors misunderstand the meaning and or significance of terms such as heritability and cultural bias that the positions of major researchers such as Arthur Jensen are misrepresented and that experts hold more of a consensus on the issues than do the authors of the educational psychology texts in this sample The analysis suggests that course instructors and students should be alert for evidence of bias in textbooks and by implication in themselves

Man's Most Dangerous Myth Ashley Montagu, 2001-04-19 Man's Most Dangerous Myth was first published in 1942 when Nazism flourished when African Americans sat at the back of the bus and when race was considered the determinant of people's character and intelligence It presented a revolutionary theory for its time breaking the link between genetics and culture it argued that race is largely a social construction and not constitutive of significant biological differences between people In the ensuing 55 years as Ashley Montagu's radical hypothesis became accepted knowledge succeeding editions of his book traced the changes in our conceptions of race and race relations over the 20th century Now over 50 years later Man's Most Dangerous Myth is back in print fully revised by the original author Montagu is internationally renowned for his work on race as well as for such influential books as *The Natural Superiority of Women* *Touching* and *The Elephant Man* This new edition contains Montagu's most complete explication of his theory and a thorough updating of previous editions The Sixth Edition takes on the issues of the Bell Curve IQ testing ethnic cleansing and other current race relations topics as well as contemporary restatements of topics previously addressed A bibliography of almost 3 000 published items on race compiled over a lifetime of work is of enormous research value Also available is an abridged student edition containing the essence of Montagu's argument its policy implications and his thoughts on contemporary race issues for use in classrooms Ahead of its time in 1942 Montagu's arguments still contribute essential and salient perspectives as we face the issue of race in the 1990s Man's Most Dangerous Myth is the seminal work of one of the 20th century's leading intellectuals essential reading for all scholars and students of race relations

J. Forge, 2012-12-06 The institutionalization of History and Philosophy of Science as a distinct field of scholarly endeavour began comparatively early though not always under that name in the Australasian region. An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 1960s similar to that which took place in other parts of the world. Today there are major Departments at the University of Melbourne, the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand. Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history, philosophy and social studies of science. Each volume comprises a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area. Papers address general issues however rather than local ones; parochial topics are avoided. Furthermore, though in each volume a majority of the contributors is from Australia or New Zealand, contributions from elsewhere are by no means ruled out. Quite the reverse in fact: they are actively encouraged wherever appropriate to the balance of the volume in question.

This unique volume is a browser's treasure trove and a handy reference for the general reader. John Simmons has been associated with Current Biography for more than fifteen years.
