Host to a large and diverse bird population as well as a long human history Virginia is arguably the birthplace of ornithology in North America David W Johnston s History of Ornithology in Virginia the result of over a decade of research is the first book to address this fascinating element of the state s natural history Tertiary era fossils show that birds inhabited Virginia as early as 65 million years ago Their first human observers were the region s many Indian tribes and later colonists on Roanoke Island and in Jamestown Explorers pushing westward contributed further to the development of a conception of birds that was distinctively American By the 1900s planter farmers naturalists and government employees had amassed bird records from the Barrier Islands and the Dismal Swamp to the Blue Ridge and Appalachian Mountains The modern era saw the emergence of ornithological organizations and game laws as well as increasingly advanced studies of bird distribution migration pathways and breeding biology Johnston shows us how ornithology in Virginia evolved from observations of wondrous creatures to a sophisticated science recognizing some 435 avian species David W Johnston taught ornithology at the University of Virginia s Mountain Lake Biological Station for nearly two decades and has edited numerous ecological studies as well as the Journal of Field Ornithology and Ornithological Monographs
