The Japanese Social Structure:

The Japanese Social Structure 日本社会,1982 **Japanese Society** Robert J. Smith,1983 A compelling illustration of Japan's evolution into an industrial state the only major industrial society to emerge outside of the Western tradition Japanese Social Structure United States. Office of Strategic Services. Schools and Training Branch,1947 The Japanese Economic and Social System Claude Lonien,2003 The Japanese economy is currently at a crossroads and the embarrassing situation the country faces today is even worse than the Meiji restoration of 1868 the defeat after World War II in 1945 and the yen appreciation after the Plaza Agreements of 1985 Indeed the traditional Japanese model is doomed to failure mainly due to economic and industrial structures that are inappropriate towards increasing globalization liberalization and deregulation However Japanese style industrial capitalism is in this work compared to the economic and social models of other developed countries and this enables us to point out the path the Japanese economy may take in the 21st century in order to survive

Japanese Social Organization Takie Sugiyama Lebra,1992-07-01 This excellent book will surely become a mainstay on the reading lists of anthropologists sociologists and Japan specialists for many years to come It provides rich and accessible ethnographic examples to illustrate basic anthropological theory The underlying theme is that although Japanese culture produced specifically Japanese social institutions these institutions can be studied using mainstream techniques The book is a model of its kind in the evenness of its contributions the quality of its writing and the thoroughness of its index

Comparing Japanese and American interaction text argues that language use is instrumental in the construction of social structure and culture **Evolution of the Japanese Social and Psychic** Sidney L. Gulick,2020-07-17 Reproduction of the original *Evolution of the Japanese Social and Psychic* by Sidney L Gulick **Social Structure Of Contemporary China** Xueyi Lu,2012-07-24 This book is the third study done by the Research Group on Social Structure Change in Contemporary China a group affiliated with the Institute of Sociology Chinese Academy of Social Sciences The group has focused on the process of development and change in contemporary Chinese social structure and come to the following conclusions Contemporary China is transitioning from a traditional agricultural and rural society to a modern industrialized and urban society from a highly centralized planned economy to a robust socialist market economic system The entire society is undertaking an unprecedented evolution During the three decades of reform and opening up China has made brilliant achievements never seen before in history Now China is in a critical period of reform and opening up with very complex far reaching and closely intertwined social problems which are also unprecedented After deep and detailed analysis the Research Group believes that these problems cannot be resolved only by economic methods In order to get to the roots of

these social problems China must develop new social policies strengthen the social structure and carry out social system reform The core purpose of the book is to recommend theories and methods on social structure to society and readers and to investigate the development and change in China s social structure We believe that social structure theory a brand new point of view to analyze the current situation is capable of deciphering the social contradictions in China s development to some extent as opposed to mere economic theory which is inadequate to fully address the structural problems in China

Modern Japanese Organization and Decision-Making Ezra F. Vogel, 2023-11-10 This book constitutes the first attempt of its kind to probe the major features of modern Japanese organization that have played such a critical role in Japan's extraordinarily rapid economic development The contributors include prominent academic business consultants such as Peter Drucker of the United States and Kazuo Noda of Japan Japanese government officials such as Yoshihisa Ojimi former Administrative Vice Minister of the Ministry of International Trade and Industry and Taishiro Shirai a member of the Central Labor Relations Commission as well as outstanding Western experts on modern Japanese organization The essays deal not only with Japanese government and business but also with the structures of a newspaper and a university and with the role of Japanese intellectuals in modern organization The portrait of Japanese organization that emerges is much more dynamic and volatile than has been generally supposed One finds business and government managers creatively using so called traditional practices in novel ways and undertaking bold departures to achieve new purposes The findings contradict the view that decision stems from below Not only do executives have an important role in initiating action but lower level officials function within a context defined by their superiors Far greater tensions and conflict exist within organizations than is commonly reported by outsiders especially in institutions like the university where conflicts often paralyze the decision making process Similarly there is far greater divergence of interest among different sectors of society than one might infer from the stereotypical view of Japan Inc And since the high level of consensus supporting the fundamental commitment to economic
