Wildlife Resources Harald H. Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising economically oriented utilisation as well as recreational educational and social use have become widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining economic development all over the world Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987
