### **Management of Amphibians, Reptiles, and Small Mammals in North America** Robert C. Szaro, Kieth E.

Severson, David R. Patton, 1988 Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value While this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others We no longer can afford to take this simplistic view of ecosystem management We need to use a more holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy This includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations

Placed at the intersection of American Studies and Communications scholarship, this book provides an essential introduction to journalism's curious and conflicted co-existence with the American democratic experiment. *The National Experience* John Morton Blum, 1981. This book highlights key results and lessons learnt from two field sites: La Suerte in Costa Rica and Ometepe, Nicaragua. It provides long-term data on species abundance and distribution. Primates receive specific attention in this book as they are flagship species and good indicators for the health of an ecosystem, but as well a money maker. Many primate species are sensitive to habitat alteration and are often hunted out first. But they play an important role as seed dispersal agents for the regeneration of the forest. The book then compares results from the two field sites with regional trends and explores potential solutions such as REDD. This book strongly calls for new approaches in conservation; it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic and political realities. Chambers's Encyclopædia Ephraim Chambers, 1870 **Environmental Analysis: The NEPA Experience** Stephen G. Hildebrand, Johnnie B. Cannon, 1993-06-09. Environmental Analysis reviews information gathered during NEPA assessments, summarizes the state of the art in methods and approaches, and defines future opportunities and new approaches required to link high-quality science to the decision-making process. Individual chapters address the process itself, present examples of recent experience with ecological impact assessment, evaluate social impact assessment, and the important role the public must play. Discuss the difficult challenge of assessing cumulative effects of multiple impacts, consider the regional and global implications of NEPA, and examine the important role of follow-up studies in the process. The authors of the 59 individual papers comprising this book represent the major sectors that have been key participants in the decision-making process from the beginning. These sectors include academia, national laboratories, federal agencies, state agencies, private industry, and foreign nations. Environmental Analysis will be interesting reading for environmental scientists, engineers, policy makers, and lawyers in government and academia, private consultants, and non-government environmental organizations. Native American Mystery Writing Mary Stoecklein, 2019-04-04. Though mystery, crime, and detective fiction are some of the most popular genres in the world, little scholarship currently exists regarding Native American writers and how they add new dimensions to this widely read literary form. Rather, the majority of scholarship examines the depiction of Native characters from the perspective of non-Native authors. *Native American Mystery Writing: Indigenous Investigations* analyzes how Native authors use the genre to foreground centuries of settler colonial crimes and comment upon the ways in which these acts continue to impact Native individuals and communities today.

Considering fourteen novels and two made for TV films this book surveys a spectrum of settler colonial crimes the Osage oil murders sexual assault against Native women missing and murdered Indigenous women the California mission system suppression of spiritual beliefs theft of land children and cultural items and of course murder Examination of these texts shows how Native authors working with the mystery crime and detective fiction formats are able to entertain readers while also sending strong social cultural and political messages that argue for strengthened tribal sovereignty and illustrate the resilience of Indigenous peoples all in order to promote discussions about creating a more just system for Native Nations
