A'Kyria Our Own Game Company, 2011-02-15 This is A Kyria Somewhere out in space lies the edge of the universe a point where there is no more void but an anti void or a full space It is a wall of matter so wide so far reaching that the beings of a thousand planets cannot trace the end of it It is where dark matter ends and white matter begins The end of the universe it seems is just the beginning of a world so vast that physics must discover new laws to explain it The surface is merely the edge of where one stage of the universe transitions into the next The mysterious white matter has mass but is not effected by or generates gravity Other mass centers create gravity they can exist anywhere and in any combination In this Universe the types of lands are as diverse as the imagination can create Suns orbit some lands to create rings of life along the endless surface Our forbears who believed that the sun orbited the planet would find their beliefs valid Life might exist in a figure 8 set of rings around cavern entrances radiating areas from tropical to glacial Moons or planetoids could spin around their own centers creating kaleidoscopes of orbiting bodies In other areas suns might exist below the surface creating cavernous lands that cover the surface like lichen a Dyson sphere with the star positioned in the center and life on the walls In A Kyria the lands do not need to be traditional or follow the methods we deem normal to create places of splendor Some lands might not need a star at all but maybe a moon heated by a sun when exiting a cavern and brings the heat down with it as it travels Imagine a weaker dimmer star that travels through a channel with all the life existing upon the surface of the cavern The sun sets when it rises above the surface leaving the cavern in darkness There are lands in permanent twilight from suns that barely rise above the surface as well as others that remain fixed giving constant daylight and burned lands where the suns are too close together There are frozen wastes and oceans that stretch to

the edges of forever lands of strange beliefs alien bizarre or comforting in its familiarity It is a land of infinite possibilities where magic and technology peasant and space ranger can meet just as easily as neighbors taking out the trash It is a world where the only limits are the limits you place on yourself Welcome to A Kyria

intensively over the last 15 years The chimpanzees have never been provisioned and live in an entirely natural state Reynolds describes their forest habitat their diet and culture their social organization and behaviour their diseases and the threats to them that derive from the actions of people in the surrounding villages the most serious of these being the presence of snares set by hunters to catch small antelopes and pigs As founder and head of the Budongo Forest Project Professor Reynolds has been responsible for compiling the numerous publications reports and dissertations written about these chimpanzees In this book he combines these new and often unpublished studies with past publications about Budongo Forest Where appropriate he also compares the Budongo chimpanzees with wild chimpanzees studied at other sites across Africa The result is the most comprehensive account of the Budongo chimpanzees ever published with a wealth of referenced material that will serve as a source of information for many years to come
