

CHAPTER 3

Integrating Pronunciation Into Listening/Speaking Classes

Greta Muller Levis and John Levis

Years ago, when a friend came over to our house, we introduced him to our “daughter” at the time, who was sitting on the living room floor, with her back to the front door.

“Jim, this is our German exchange student, Monika. Monika, this is Jim.”

“Hello,” said Jim.

“Hello,” replied Monika.

“You don’t sound like you’re from Germany,” said Jim.

After Jim had left, Monika let us know how incredulous she was. “How did he know I didn’t sound German? All I said was ‘hello!’”

How indeed? The consonants /h/ and /l/ are not all that different in German than they are in English. The vowels /ɛ/ and /o/ are not necessarily very different either. What was it that made Jim think Monika sounded like she didn’t have a foreign accent?

Probably it was a combination of things, including slight differences in vowel production, but more importantly, it was her prosody, or suprasegmentals, including the relative length (marked phonetically with a colon) and melody of the two syllables.

/hɛ - l oʊ - /

Prosody gives a language the characteristic shape that carries a person’s meaning beyond the words being spoken. Jim heard in Monika’s “hello” a person who was fluent and confident speaking English. Beyond the simple greeting word was an expression of her ability to communicate in a familiar and comfortable way.

This book provides educators with an accessible guide to best practices concerning content based instruction CBI models and their use in English learner inclusive classrooms The author effectively bridges the gap between theory and practice with a critical analysis of practical examples and diverse strategies for the inclusion of English learners into K 12 general education

courses The book also raises controversial questions regarding who is qualified to teach English learners and who is responsible for doing so looking at the difficulties faced by both general educators and ESL teachers in Inclusive Classrooms By providing a lens through which both ESL teachers and general educators are able to analyze compare and contrast a range of widely employed CBI methods this book allows teachers to make informed decisions in their EL program development and work with English learners in K 12 schools

The Role of Letter-Speech Sound Integration in Typical and Atypical Reading Development Jurgen Tijms, Silvia Brem, Gorka Fraga González, Iliana I. Karipidis, 2020-07-24 Fluency is the quintessence of effective reading To obtain socio economic success fluent reading is of primordial importance and reading is considered a crucial marker of an individual s life course Approximately 5% of children are affected by developmental dyslexia exhibiting inaccurate word recognition spelling phonological decoding and most importantly severely dysfluent reading which remains as their most characterizing and persistent deficit Unable to attain society s literacy demands individuals with dyslexia are at severe risk for adverse academic economic and psychosocial consequences Recently it has been posed that the development of automatic letter speech sound LSS integration is critical in the acquisition of fluent reading skills and in particular that a failure to develop automatic LSS integration results in an impairment of reading fluency In support neurocognitive research has suggested that the development of automatized processing of LSS associations is an essential step in the formation of a functional neural network for reading Furthermore both neurocognitive and behavioural studies have suggested a less efficient LSS integration in children with dyslexia than in typical readers Finally results from intervention studies have suggested that training LSS might be a promising approach to ameliorate dysfluent reading in children with dyslexia Nonetheless there is still a considerable gap of knowledge in our understanding of the mechanisms by which learning LSS associations relate to dys fluent reading
