Hear the Difference? Robert Hansen,2003-06-13 Go to a meeting seminar or presentation in business education sports even personal growth Whats the first thing you hear Change Everything is change And we all have to need to and get to change And whats the very first thing Jesus tells everyone Change Greek metanoete Mt 4 17 So whats the difference Whats so special about what Jesus says Change is what everybody says Discover how surprisingly hard it is for Christians and non Christians alike to hear the gospel even if shown the difference and that this difference makes all the difference in the world

What's So Good About Biodiversity? Donald S. Maier,2012-05-23 There has been a deluge of material on biodiversity starting from a trickle back in the mid 1980 s However this book is entirely unique in its treatment of the topic It is unique in its meticulously crafted scientifically informed philosophical examination of the norms and values that are at the heart of discussions about biodiversity And it is unique in its point of view which is the first to comprehensively challenge prevailing views about biodiversity and its value According to those dominant views biodiversity is an extremely good thing so good that it has become the emblem of natural value The book s broader purpose is to use biodiversity as a lens through which to view the nature of natural value It first examines on their own terms the arguments for why biodiversity is supposed to be a good thing This discussion cuts a very broad and detailed swath through the scientific economic and environmental literature It finds all these arguments to be seriously wanting Worse these arguments appear to have consequences that should dismay and perplex most environmentalists The book then turns to a deeper analysis of these failures and suggests that they result from posing value questions from within a framework that is inappropriate for nature s value It concludes with a novel suggestion for framing natural value This new proposal avoids the pitfalls of the ones that prevail in the promotion of biodiversity And it exposes the goals of conservation biology restoration biology and the world s largest conservation organizations as badly ill conceived

Designing Questionnaires for Language Studies Lamont Antieau,2025-09-30

Designing Questionnaires for Language Studies is a guide to the design and use of questionnaires for empirical linguistic research particularly in the areas of dialectology sociolinguistics and linguistic anthropology Whether completed via written correspondence or through interviewing questionnaires play an essential role in linguistic research Yet the design of questionnaires is rarely taught formally leaving researchers to learn effective design in practice This practical and accessible text offers structured step by step guidance to provide researchers with the skills they need to make the most of questionnaire based research It also provides a history of the use of questionnaires in linguistic research and critically examines the assumptions and motivations inherent in their creation and administration as well as that of the questions that populate them and discusses how biases can negatively affect the outcome of the research itself Experience using these tools in the field has led to their refinement over time Armed with this knowledge readers can make informed decisions about how to structure their own questionnaires as they embark on linguistic investigations or use it to better understand the results of previous research that has relied on questionnaires for data collection
