World Myth or History? J.G. Cheock, 2017-10-02 World myth deciphered and organized into a coherent story of our past It is almost impossible to read world mythology without noticing common threads and patterns that seem to paint a bigger picture A story told by our ancient ancestors for future generations to remember and learn What if the eyewitnesses to past events were taken seriously What if we listen to their stories with unbiased ears free of assumptions What if their stories were backed up by scientific discoveries What if the myths can explain the mysteries [A Soaring Spirit](#), 1987 Photographs and text cover the history of Persia Greece the early Romans and the unfolding of Eastern religions **Freedom: The End of the Human Condition** Jeremy Griffith, 2016-05-24 FREEDOM has its own very informative website visit www.humancondition.com The fastest growing realization everywhere is that humanity can't go on the way it is going Indeed the great fear is we're entering endgame where we appear to have lost the race between self destruction and self discovery the race to find the psychologically relieving understanding of our good and evil afflicted human condition Well astonishing as it is this book by biologist Jeremy Griffith presents the 11th hour breakthrough biological explanation of the human condition necessary for the psychological rehabilitation and transformation of our species The culmination of 40 years of studying and writing about our species psychosis FREEDOM delivers nothing less than the holy grail of insight we have needed to free ourselves from the human condition It is in short as Professor Harry Prosen a former president of the Canadian Psychiatric Association asserts in his Introduction The book that saves the world Griffith has been able to venture right to the bottom of the dark depths of what it is to be human and return with the fully accountable true explanation of our seemingly imperfect lives At long last we have the redeeming and thus transforming understanding of human behaviour And with that explanation found all the other great outstanding scientific mysteries about our existence are now also able to be truthfully explained of the meaning of our existence of the origin of our unconditionally selfless moral instincts and of why we humans became conscious when other animals haven't Yes the full story of life on Earth can finally be told and all of these incredible breakthroughs and insights are presented here in this greatest of all books *Teacher's Manual for All Ye Lands: World Cultures and Geography*, , **Mirror, Mirror** Mark Pendergrast, 2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness As our first technology for contemplation of the self the mirror is arguably as important an invention as the wheel Mirror Mirror is the fascinating story of the mirror's invention refinement and use in an astonishing range of human activities from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror's key role in the use and understanding of light Pendergrast spins tales of the 2 500-year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three

days the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices and George Ellery Hale the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century's largest ground based telescope Like mirrors themselves Mirror Mirror is a book of endless wonder and fascination

The Achievement of Genius Lawrence F. Allen, 2022-12-18 Who are the men and women drawn from all civilizations and historical epochs that have made the most original and long lasting contributions to human progress How can we in concise and human terms delineate the various achievements of the most important religious founders philosophers artists prophets scientists mathematicians leaders and architects A fitting pursuit for these distracting and confusing times would be a careful examination of the geniuses whose achievements are so original and creative that they are woven into the very fabric of our civilization The goal of this book is not merely a study of the past It also raises questions about the goal of human life and its amazing creative potentialities If these achievements of ancient or recent times were possible in the conditions of isolation and hostility by the surrounding world what even greater achievements are possible in the future Is there something in these geniuses lives and works that we can apply to our present dilemmas It's certainly worth a closer look at the greatest geniuses in all of history
