Ukrainian Evangelical Missionary Surge from 1989 to 1999 John Edward White,2020-03-16 Throughout its history the Soviet Union was one of the most closed places in the world to missionary work As perestroika came in the late 1980s and the Soviet Union fell in 1991 a spiritual vacuum formed as massive numbers of people became interested in Christianity An unprecedented freedom allowed evangelicals to engage in missionary work Much has been written about foreign evangelical missionary work during this period but virtually nothing has been written about nationals doing ministry This book examines the remarkable surge in Ukrainian evangelical missionary work from 1989 to 1999 Both Baptists and Pentecostals engaged in a wave of missions flowing from Ukraine to the end of the earth Siberia What were these pioneering missionaries like What motivated them What enabled them to do what had been forbidden for so long What legacy did they leave for us today What can we learn from their example for future missions This book also looks at how a surge in missions takes place analyzing the factors behind the Ukrainian evangelical missionary surge by looking at different models for change Here we consider what steps can we take to help bring about new missionary surges **Archaeology in Society** Marcy Rockman,Joe

Flatman,2011-11-17 The practice of archaeology has many different facets from academia to government to cultural resource management to public media Considering the place of archaeology in society means understanding the role that archaeology has in the present day and a sense of the contributions that it can make in each of these areas both now and in the future Archaeologists come to the field to pursue a variety of interests teaching examining history preserving the environment or studying a specialized time period or interest The outside world has a number of other expectations of archaeology preservation tourism and education to name but a few From a broad and varied background the editors have compiled a rare

group of contributors uniquely qualified to address questions about the current state of archaeology and its relevance in society. There is no single answer to the question of how the field of archaeology should develop and what it can do for society. Instead, the authors in this volume lay out the many ways in which archaeology is relevant to the present day, considering, for example, climate change, energy exploration, warfare, national identity, the importance of stories and how they are told, and how and why opportunities to engage with the past through museums, digs, television, classes, and the print media have the form they currently do, creating a state-of-the-art tool for archaeologists, policymakers, and the public alike to understand the work of many in the field and address the challenges we all face.

Democracy versus Modernization Vladislav

Inozemtsev, Piotr Dutkiewicz, 2013-05-07 This book seeks to re-think democracy. Over the past years, there has been a tendency in the global policy community and even more widely in the world's media to focus on democracy as the gold standard by which all things political are measured. This book re-examines democracy in Russia and in the world more generally, as idea, desired ideal, and practice. A major issue for Russia is whether the modernization of Russia might not prosper better by Russia focusing directly on modernization and not worrying too much about democracy. This book explores a wide range of aspects of this important question. It discusses how the debate is conducted in Russia, outlines how Russians contrast their own experiences unfavourably with the experience of China, where reform and modernization have been pursued with great success with no concern for democracy, and concludes by assessing how the debate in Russia is likely to be resolved.
