The Developing World of the Child Jane Aldgate,2006 Written as part of a training pack for practitioners working in

children's services and child protection and bringing together leading figures from a range of disciplines this important text shows how the latest child development theories can be applied to professional practice. Considering theories of development throughout the lifespan from the early years through to adolescence and transitions to adulthood this resource is essential reading for a range of professionals including social workers, teachers and health and mental health professionals. The authors build up an integrated picture of the developing world of the child looking at genetic and biological influences alongside individual psychological, interpersonal, familial, educational and wider community domains. The final part of the book looks specifically at issues for practice including chapters on communicating with children, exercising professional judgement and planning interventions and outcomes in children's services.

Child and Adolescent Mental Health Christine Hooper, Margaret Thompson, Catherine Laver-Bradbury, Chris Gale, 2012-02-24. The book covers all the core aspects of child and adolescent mental health starting with the background to emotional and behavioural problems and looking at models and tools for assessment and treatment before examining specific problems encountered in children, young people and their families from different cultural backgrounds. Key features: clear

Child Public Health Dr Mitch Blair, Professor Sarah Stewart-Brown, Dr Tony Waterston, Dr Rachel Crowther, 2010-01-21. Despite children making up around a quarter of the population the first edition of this book was the first to focus on a public health approach to the health and sickness of children and young people. It combined clinical and academic perspectives to explore the current state of health of our children, the historical roots of the speciality and the relationship between early infant and child health on later adult health. Child public health is a rapidly developing field and is increasingly recognised throughout the world as a major area of focus for population health. Targeting the health of children now is essential if we are to achieve a healthy population as adults. For the second edition the text has been revised and updated with new material on health for all children, global warming, child participation systems, theory, refugees, commissioning and sustainable development. Child Public Health 2e will be of interest to public health practitioners, paediatricians, general practitioners with a child health and commissioning interest and GP trainees. Whilst paediatricians are given a unique population perspective on their clinical specialty, public health professionals will gain a specialist insight into a specific population group and primary care doctors, nurses and managers will find support for their commissioning and clinical governance agendas.

Child and Adolescent Mental Health Cathy Laver-Bradbury, Margaret J.J. Thompson, Christopher Gale, Christine M. Hooper, 2021-05-12. This textbook provides an overview of child and adolescent mental health. The text covers all core aspects on the subject from the importance of knowing why mental health in children is important to how to assess, formulate and treat a variety of presentations seen in children and young people. Beginning with an overview of conditions and the background to emotional and behavioural problems, the book examines the different models and tools used to assess and treat children and young people and provides an outline of the practitioners working to help this population. Chapters consider the many diverse identities and groups

within the population addressing specific problems encountered in children young people and their families from different cultural backgrounds This revised edition addresses issues of current public debate such as gender identity and the role of social media in children s and young people s development and behaviour Featuring authors from a variety of clinical and research backgrounds this fully revised third edition is an important resource for all professionals working with children young people and their families including student and practitioner psychiatrists clinical psychologists mental health nurses and social care specialists
