Zajonc, 1972 **Wild Justice** Marc Bekoff, Jessica Pierce, 2024-05-31 A compelling case that humans are not the only species with moral intelligence based on years of research into animal behavior Discover Scientists have long counseled against interpreting animal behavior in terms of human emotions warning that such anthropomorphizing limits our ability to understand animals as they really are Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked Aren't these clear signs that animals have recognizable emotions and moral intelligence With **Wild Justice** Marc Bekoff and Jessica Pierce unequivocally answer yes Marrying years of behavioral and cognitive research with compelling and moving anecdotes Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors including fairness empathy trust and reciprocity Underlying these behaviors is a complex and nuanced range of emotions backed by a high degree of intelligence and surprising behavioral flexibility Animals in short are incredibly adept social beings relying on rules of conduct to navigate intricate social networks that are essential to their survival Ultimately Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species morality is an evolved trait that we unquestionably share with other social mammals Sure to be controversial **Wild Justice** offers not just cutting edge science but a provocative call to rethink our relationship with and our responsibilities toward our fellow animals This well thought out provocative work will give scientific and lay readers plenty of examples to rethink and open new paths of research into the lives and minds of animals Choice I will never be able to look at a dog or a cat or a cow or a coyote for that matter in the same way again Telegraph An excellent introduction to a new science Booklist
