Social Change In Complex Organisations:

Social Change in Complex Organizations Jarald Hage, Michael Aiken, 1970 **Designing Effective Organizations** David K. Banner, T. Elaine Gagné, 1995

Takes a holistic approach that is often lost in more narrow minded texts Great for graduate students Robert Kramer Department of Management Science George Washington University With its distinctive voice this is a basic text for all courses on organizational theory BUSINESS HORIZONS This book presents an avant garde approach to an important topic about which to my way of thinking no one else has written even a contemporary book The authors perspective readily allows the reader to comprehend and appreciate what is always present often hidden and almost always controversial the subjective side of organizational life The book you are about to read provides the rationalist and the veteran exactly what they each crave the most It provides synthesis and order within a structure that acknowledges the interaction between an individual s motivations and needs and the apparent order that individual perceives The use of cartoons and other right brain highlighters allow readers to look down as opposed to looking up to understand and critique a phenomenon that a theory purports to explain and to self reflect on the importance a theory holds for the field Certainly this is a book for the 1990s from the Foreword by Samuel A Culbert John E Anderson Graduate School of Management University of California Los Angeles What the authors are attempting is very difficult David K Banner and T Elaine Gagn are declaring the presence of a new paradigm of the organization before it has actually crystallized and become part of the mainstream of organization theory As such the book is an act of leadership Peter B Vaill Professor of Human Systems School of Business and Public Management The George Washington University A valuable resource to the students and instructors of organizational design and theory courses The comprehensive coverage of traditional organization theory topics coupled with the authors contemporary orientation and transformational perspective ensure this The organizational design and theory text by Banner and Gagn addresses an important fact of organizational life that is usually ignored or given superficial treatment at best in existing organization theory texts namely that our implicit assumptions worldviews metaphors paradigms and organizational culture are important determinants of why we organize the way we do Douglas Austrom President and Cofounder Turning Point Associates Indianapolis Indiana A valuable basic text for business related undergraduate or postgraduate programmes on organization theory and practice particularly from a transformational perspectives LONG RANGE PLANNING Providing a distinctive voice Designing Effective Organizations is the new basic text for the undergraduate or MBA level course on organization theory Although it contains the same comprehensive topical coverage as the leading traditional organization theory texts Designing Effective Organizations is definitely not a clone of the others in the field David K Banner and T Elaine Gagn develop a transformational perspective which sees the world of the organization as a projection of each organizational member s consciousness as opposed to the traditional rational perspective They thoroughly cover all the basics but in a manner that reflects today s changing management paradigms Designing Effective Organizations is the perfect text for

Complexity Perspectives in Innovation and Social Change David Lane, Denise Pumain, Sander Ernst van der Leeuw, Geoffrey West, 2009-02-13

Innovation is nowadays a question of life and death for many of the economies of the western world Yet due to our generally reductionist scientific paradigm invention and innovation are rarely studied scientifically Most work prefers to study its context and its consequences As a result we are as a society lacking the scientific tools to understand improve or otherwise impact on the processes of invention and innovation This book delves deeply into that topic taking the position that the complex systems approach with its emphasis on emergence is better suited than our traditional approach to the phenomenon In a collection of very coherent papers which are the result of an EU funded four year international research team's effort it addresses various aspects of the topic from different disciplinary angles One of the main emphases is the need in the social sciences to move away from neo darwinist population thinking to organization thinking if we want to understand social evolution Another main emphasis is on developing a generative approach to invention and innovation looking in detail at the contexts within which invention and innovation occur and how these contexts impact on the chances for success or failure Throughout the book is infused with interesting new insights but also presents several well elaborated case studies that connect the ideas with a substantive body of real world information

Political Protest and Social Change Charles F. Andrain, David Ernest Apter, 1995 At the close of the twentieth century political protests have erupted throughout the world While the collapse of communism was certainly one of the most spectacular protest related events smaller protests have become ubiquitous In Los Angeles labor activists campaign against commercial real estate owners to unionize janitors mainly Latina immigrants In the People's Republic of China peasants revolt against tax collectors Amazonian Indians protest public and economic policies that destroy their culture and rainforest habitat This book analyzes the reciprocal impact of cultural beliefs sociopolitical structures and

individual behaviors on protests throughout the world Why do individuals participate in protest activities How do cultural beliefs personal attitudes and subjective perception influence the potential protester Addressing the issue of agency in protest the authors also examine why protestors enlist different tactics to achieve their goals Why are some protests violent and others nonviolent When and why do activists conclude that it is better to accommodate than confront Finally and crucially what are the consequences of protest movements Political Protest and Social Change C. Andrain,D.

Apter,1994-12-19 This book probes three issues about the linkage between political protests and social change First why do individuals participate in protest activities including nonviolent movements and revolutions How do cultural beliefs sociopolitical structures personal attitudes motives and perceptions shape the decision to participate Second why do participants choose certain tactics Protesters use different types of tactics violent vs nonviolent public vs covert organized vs spontaneous and confrontation vs accommodation with other groups political parties and government agencies Most activists view a particular tactic as a useful means to attain their policy demands Third what policy consequences emerge from the activities of protest movements The book explores the impact of protests on social change and on the distribution of political power particularly greater access of subordinate groups to government policymakers A theory of political opportunities helps explain these issues about the origins activities and outcomes of protests **University of Michigan Official Publication**

Routledge Revivals: Varieties of Residential Experience (1975) Jack Tizard, Ian Sinclair, R. V. G. Clarke, 2017-07-05 First published in 1975 this book compiles a number of studies concerning institutional care and children which address the question of why institutions that serve apparently similar functions differ so much The book uses comparative methods such as measurement of different dimensions of institutional care and analysis of interrelationships among specific structural and functional features which characterise particular institutions As a result the book draws broad conclusions about the importance of factors that have dynamic influence on the manner in which institutions function and the reasons why they differ The editors reject the steampress model which postulates that institutions are more or less alike They discuss ideological and organisational variation differences in staffing and the manner in which children respond to them and

consider these issues as factors that influence the way in which an institution functions as a whole Subsequent chapters describe comparative studies carried out in institutions for the mentally handicapped approved schools residential nurseries probation hostels other correctional institutions and units for autistic children The book enables the reader to appreciate achievements and shortcomings of contemporary research and thinking in this field Announcement University of Michigan--Dearborn,1977 A Critical Introduction to Coaching and Mentoring David E Gray,Bob Garvey,David A Lane,2016-03-17 This is the definitive introduction to coaching and mentoring written by an experienced and multidisciplinary team Taking you all the way through from the emerging theory to informed practice the book covers Skills purposes and outcomes of coaching and mentoring processes The many settings in which they take place public private and voluntary Coaching and mentoring s evidence base and how it is assessed The professionalization of coaching and mentoring and a move towards integration Supported by a wide range of case studies activities further questions and topics for discussion this book is a comprehensive but accessible introduction The authors take a critical approach and go beyond the basics to support your development as a critically reflective practitioner It is essential reading for those studying coaching and mentoring and professionals looking to integrate coaching and mentoring into their organizations **Guide to Programs** National Science Foundation (U.S.),1974
