Lee,1991-05-24 The spectacular economic and technological achievements of certain Far Eastern countries have attracted world wide attention The markets of the West are dominated by the products of countries with no traditions of industrialisation and few natural resources The reaction to this phenomenon has been a mixture of amazement admiration envy and curiosity to know how it was done This book addresses these questions through a study of the modernisation of three of the most successful Asian societies Japan Singapore and Hong Kong <u>Social Control and Social Change</u> Liddell Henry,2019-08-24 Socialization is predominately an unconscious process by which a new born child learns the values beliefs rules and regulations of society or internalizes the culture in which it born Social control is described in detail at the end of the book It is intended as a book for undergraduate and postgraduate students of sociology and a reference tool to the researchers and academic professionals this comprehensive and well structured book presents in a systematic way the Social Control and Social Change The book is undoubtedly a valuable asset for the students researchers as well as teachers of sociology In addition general readers concerned with social aspects and social progress will find it extremely informative <u>Social Change in Japan, 1989-2019</u> Carola Hommerich,Naoki Sudo,Toru Kikkawa,2020-10-15 Based on extensive survey data this book examines how the population of Japan has experienced and processed three decades of rapid social change from the highly egalitarian high growth economy of the 1980s to the economically stagnating and demographically shrinking gap society of the 2010s It discusses social attitudes and values towards for example work gender roles family welfare and politics highlighting certain subgroups which have been particularly affected by societal changes It explores social consciousness and concludes that although many Japanese people identify as middle class their reasons for doing so have changed over time with the result that the optimistic view prevailing in the 1980s confident of upward mobility has been replaced by people having a much more realistic view of their social status **The New Era or The Coming Kingdom** Rev. and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can t afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human   Education Studies W. Flanagan,1998-02-27 Covering the knowledge teachers need to improve the quality of teaching and learning in the foundation phase this text deals with rules of behaviour in schools and society and how society and schools create and establish rules for living
