

An illustration of a diverse group of six people (three men and three women) of various ethnicities and ages, standing behind a large white banner. They are all smiling and have their arms raised in a celebratory gesture. Above them are floating icons: a blue speech bubble with a heart, a red speech bubble with three dots, and several yellow stars. The background is light blue with stylized green plants on the sides. The banner they are holding contains the text 'What is Social Anthropology?' in a bold, black, sans-serif font.

Social Anthropology:

Social and Cultural Anthropology in Perspective Ioan Lewis, 2017-09-29 Social anthropology is in the classic definition dedicated to the study of distant civilizations in their traditional and contemporary forms But there is a larger aspiration the comparative study of all human societies in the light of those challengingly unfamiliar beliefs and customs that expose our own ethnocentric limitations and put us in our place within the wider gamut of the world's civilizations Thematically guided by social setting and cultural expression of identity *Social and Cultural Anthropology in Perspective* is a dynamic and highly acclaimed introduction to the field of social anthropology which also examines its links with cultural anthropology A challenging new introduction critically surveys the latest trends pointing to weaknesses as well as strengths Presented in a clear lively and entertaining fashion this volume offers a comprehensive and up to date guide to social anthropology for use by teachers and students Skillfully weaving together theory and ethnographic data author Ioan M Lewis advocates an eclectic approach to anthropology He combines the strengths of British structural functionalism with the leading ideas of Marx Freud and Levi Strauss while utilizing the methods of historians political scientists and psychologists One of Lewis particular concerns is to reveal how insights from traditional cultures illuminate what we take for granted in contemporary industrial and post industrial society He also shows how in the pluralist world in which we live those who study other cultures ultimately learn about themselves Social anthropology is thus shown to be as relevant today as it has been in the past

The Craft of Social Anthropology A. L. Epstein, 1978-01-01 In social anthropology as in other branches of science there is a close relationship between research methods and theoretical problems Advancing theory and shifts in orientation go hand in hand with the development of techniques and mutually influence one another If the development of modern social anthropology owes much to its established tradition of fieldwork it is also clear that the procedures that anthropological fieldwork should follow in the laboratory can never be prescribed in absolute terms nor become wholly standardized Yet as anthropological analysis is refined it becomes increasingly important that students in the field be aware of the need to collect basic kinds of data and know how to set about doing so In this volume anthropologists who have worked closely together for many years at the Rhodes Livingstone Institute for Social Research Lusaka and or in the Department of Social Anthropology University of Manchester discuss within a common framework modern fieldwork methods as tools for examining a number of problems of current anthropological interest Elizabeth Colson J Clyde Mitchell and J A Barnes stress aspects of the role of quantification in social anthropology and indicate a range of problems that can be illuminated by the use of quantitative techniques Equal importance is attached by all contributors to the collection and analysis of detailed case material a topic explored in J van Velsen's essay A L and T S Epstein V W Turner and M G Marwick consider the kinds of data relevant to anthropological discussion in the fields of economics law ritual and witchcraft and the methods by which such material may be collected The volume is introduced by Max Gluckman former director of the Rhodes Livingstone Institute

Towards an Operational Social Anthropology Michel Verdon, 2024-08-08

Anthropology's original aim that of Maine and Morgan in the second half of the nineteenth century was to explain social variability Behind that variability anthropologists searched for regularities that a theory would explain It was thus both comparative and positivist aiming to be scientific The first theory to emerge was evolutionism It was soon followed by functional structuralism structuralism and all the other isms that came after In the final analysis unlike scientific theories all these theories did not supplant one another but merely agglutinated The original project of a comparative and positivist anthropology thus completely failed and the new gurus explain it by the very nature of anthropology's subject human beings in society which they claim are not amenable to scientific discourse In this first of two books Professor Michel Verdon rejects this defeatist explanation To him the failure does not stem from anthropology's objects but from the knowing subject The explanation lies in the process of knowing it is epistemological and he finds the ultimate reason in the cosmology that underlies all theories and that no one has hitherto explored This enables him completely to overturn the traditional wisdom it is this implicit cosmology that radically hinders any conceptual rigour in the study of social organization since it defines groups in a way that makes them ontologically variable In the light of this unique diagnosis he can define a new language which he labels operational that yields rigorous comparisons leading to refutable and rectifiable theories In a second book that will soon follow he applies this language to a number of ethnographies and draws from them astonishing conclusions about societies traditionally studied by anthropology

Theory in Social and Cultural Anthropology R. Jon McGee, Richard L. Warm, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories

However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why In response SAGE Reference is publishing the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader s Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader s Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

Social Anthropology Kevin Jack Riley, Clifford Wilcox, 2017-07-28 Robert Redfield is remembered today primarily as an anthropologist but during his lifetime Redfield s cross disciplinary activity reflected a strong interest in infusing anthropological practice with sociological theory Like a handful of other anthropologists including A R Radcliffe Brown and Bronislaw Malinowski who shared his interests during the 1920s through 1930s his works came to define a new subfield known as social anthropology Redfield was distinct in being one of the first Americans to devote himself seriously to social anthropology a field dominated initially by British scholars He spent his career at the University of Chicago and his anthropology bore the distinct mark of sociology as developed and practiced at that institution Indeed Redfield played a major role in defining what has been called the second Chicago school of sociology This volume brings together Redfield s most important contributions to social anthropology During the 1920s sociology and anthropology constituted a single department at the University of Chicago Although most students concentrated on sociology or anthropology Redfield chose to pursue both fields with equal intensity He adopted as his central interest the leading problematic of the 1920s the study of social change Chicago School sociologists approached social change by examining zones of rapid transition within the city for example areas populated by recently arrived immigrants with the goal of elucidating general principles or dynamics of social transition Redfield s work can be seen as falling into three distinct theoretical categories 1 the study of social change or modernization 2 peasant studies and 3 the comparative study of civilizations Drawing from articles book excerpts and unpublished papers and letters this work presents Redfield s central contributions in each of these areas Seen as a whole this volume traces Redfield s seminal contributions to the early development of mo
