Social Change in the Industrial Revolution. An Application of Theory to the Lancashire Cotton Industry, 1770-1840. [With a Bibliography]. together and that this ideal family broke down under the impact of urbanization and industrialization. The essays in this volume challenge this myth and provide dramatic revisions of simplistic notions about change in the American family. Based on detailed research in a variety of sources including extensive oral history interviews of ordinary people, these essays examine major changes in family life, dispel myths about the past, and offer new directions in research and interpretation. The essays cover a wide spectrum of issues and topics ranging from the organization of the family and household to the networks available to children as they grow up, to the role of the family in the process of industrialization, to the division of labor in the family along gender lines and to the relations between the generations in the later years of life. While discussing family relations in the past and revising prevailing notions of social change, these interdisciplinary essays also provide important perspectives on the present.

The Industrial Revolution and Economic Growth R. M. Hartwell, 2017-06-26. This volume first published in 1971 brings together eleven essays and articles on the history of the industrial revolution. Method is the central consideration and the author discusses ways in which historians have analysed the industrial revolution, demonstrates inconsistency and bias in their interpretations, and suggests an appropriate framework of economic theory for future studies. This title will be of interest to students of history and economics.

Social Change Eva Etzioni-Halevy, 2024-10-31. First published in 1981, *Social Change* offers a critical review of the main classical and modern theories of social change and a study of the processes of change in western societies since modernization. It focusses on the cardinal aspects of society and those that have figured most prominently in various theories: the economy, the class structure, the political structure, and the structure of education as they changed throughout the process of modernization and up to the 1980s. The book is divided into three parts. Part I presents a general discussion of classical and contemporary theories of the advent and maturation of modern society in Western capitalist and non-Western countries. Part II provides a more detailed discussion of modernization and subsequent changes in the Western capitalist societies. Part III examines alternative social formations: communes and co-operatives. This book will be a beneficial read for students and researchers of sociology.
