## **Songs Of The Gorilla Nation My Journey Through Autism:**

**Songs of the Gorilla Nation** Dawn Prince-Hughes, Ph.D.,2005-03-22 This is a book about autism Specifically it is about my autism which is both like and unlike other people s autism But just as much it is a story about how I emerged from the darkness of it into the beauty of it In this elegant and thought provoking memoir Dawn Prince Hughes traces her personal growth from undiagnosed autism to the moment when as a young woman she entered the Seattle Zoo and immediately became fascinated with the gorillas Having suffered from a lifelong inability to relate to people in a meaningful way Dawn was surprised to find herself irresistibly drawn to these great primates By observing them and later working with them she was finally able to emerge from her solitude and connect to living beings in a way she had never previously experienced *Songs of the Gorilla Nation* is more than a story of autism it is a paean to all that is important in life Dawn Prince Hughes s evocative story will undoubtedly have a lasting impact forcing us like the author herself to rediscover and assess our own understanding of human emotion

**Autistic Dreaming** Anna Reading,2025-08-01 The relationship between storytelling neurodiversity and memory remains critically overlooked While scholarship recognizes the presence of neurodiverse thinking in popular folktales and access to works by autistic people is growing the opportunity neurodiverse storytelling offers to reshape communication and remembrance is largely neglected *Autistic Dreaming* illuminates how the integration of neurodivergent perspectives can expand ideas of polysensory memory and the connection between human and more than human memory Focusing on autistic activists blogs memoirs artworks and films this study spotlights a neuroqueer method of remembering that reforges links between the present and the past and the individual and collective *See It Feelingly*

Ralph James Savarese,2018-10-26 Ralph James Savarese showcases the voices of autistic readers by sharing their unique insights into literature and their sensory experiences of the world thereby challenging common claims that people with autism have a limited ability to understand language to partake in imaginative play and to generate the complex theory of mind necessary to appreciate literature

**Carnal Aesthetics** Marta Zarzycka,Bettina Papenburg,2012-12-18 Art today is an increasingly multifaceted phenomenon encompassing transgressive works that intervene in war and ecological disasters in inequalities and revolutionary changes in technology *Carnal Aesthetics* is a fascinating new examination of this aspect of contemporary visual culture Employing recent theories of transgressive body imagery trauma affect and sensation it provides a fresh look at the meeting point between the politics of representation and the politics of perception through the prismatic lens of feminist theory Acclaimed scholars analyse a wide range of seminal case studies coming from different media digital photography painting video film and multimedia art They explore here a number of transgressive movements that significantly reconfigure the relationship between the body and the image Unlike other books on the complex relationship between politics and aesthetics *Carnal Aesthetics* seeks to provide a novel approach to art and culture by challenging the primacy of vision and by injecting an intersectional perspective into the fields of visual studies film and media studies as well

as trauma studies It is a significant contribution across these dynamic fields of exploration for scholars who deal with the socio political nature of contemporary visual culture in their work ***Autistic Intelligence*** Douglas W. Maynard, Jason Turowetz, 2022-05-25 An examination of diagnostic processes that questions how we can better understand autism as a category and the unique forms of intelligence it glosses As autism has grown in prevalence so too have our attempts to make sense of it From placing unfounded blame on vaccines to seeking a genetic cause Americans have struggled to understand what autism is and where it comes from Amidst these efforts however a key aspect of autism has been largely overlooked the diagnostic process itself That process is the central focus of *Autistic Intelligence* The authors ask us to question the norms by which we measure autistic behavior to probe how that behavior can be considered sensible rather than disordered and to explore how we can better appreciate the individuality of those who receive the diagnosis Drawing on hundreds of hours of video recordings and ethnographic observations at a clinic where professionals evaluated children for autism the authors analysis of interactions among clinicians parents and children demystifies the categories tools and practices involved in the diagnostic process *Autistic Intelligence* shows that autism is not a stable category it is the outcome of complex interactional processes involving professionals children families and facets of the social and clinical environments they inhabit The authors suggest that diagnosis in addition to carefully classifying children also can highlight or include unique and particular contributions those with autism potentially can make to the world around us ***Underdogs*** Heather Love, 2021-09-17 A pathbreaking genealogy of queer theory that traces its roots to an unexpected source sociological research on marginal communities in the era before Stonewall The sociology of social deviants flourished in the United States at midcentury studying the lives of outsiders such as homosexuals Jews disabled people drug addicts and political radicals But in the following decades many of these downcast figures would become the architects of new social movements activists in revolt against institutions the state and social constraint As queer theory gained prominence as a subfield of the humanities in the late 1980s it seemed to inherit these radical activist impulses challenging not only gender and sexual norms but also the nature of society itself With *Underdogs* Heather Love shows that queer theorists inherited as much from sociologists as they did from activists Through theoretical and archival work Love traces the connection between midcentury studies of deviance and the antinormative antiessentialist field of queer theory While sociologists saw deviance as an inevitable fact of social life queer theorists embraced it as a rallying cry A robust interdisciplinary history of the field *Underdogs* stages a reencounter with the practices and communities that underwrite radical queer thought ***The Asperger Plus Child*** George T. Lynn, Joanne Barrie Lynn, 2007 This practical guide to helping children with complex diagnoses at home and at school is based on current research as well as the author's clinical observations from working with this population for 15 years Written for parents teachers counselors and medical professionals ***From Madness to Mental Health*** Greg Eghigian, 2009-12-10 *From Madness to Mental Health* neither glorifies nor denigrates the contributions of psychiatry clinical psychology and

psychotherapy but rather considers how mental disorders have historically challenged the ways in which human beings have understood and valued their bodies minds and souls Greg Eghigian has compiled a unique anthology of readings from ancient times to the present that includes Hippocrates Julian of Norwich s Revelations of Divine Love penned in the 1390s Dorothea Dix Aaron T Beck Carl Rogers and others culled from religious texts clinical case studies memoirs academic lectures hospital and government records legal and medical treatises and art collections Incorporating historical experiences of medical practitioners and those deemed mentally ill From Madness to Mental Health also includes an updated bibliography of first person narratives on mental illness compiled by Gail A Hornstein

### **Disability Studies and the Environmental**

**Humanities** Sarah Jaquette Ray,Jay Sibara,2017-06 Although scholars in the environmental humanities have been exploring the dichotomy between wild and built environments for several years few have focused on the field of disability studies a discipline that enlists the contingency between environments and bodies as a foundation of its scholarship On the other hand scholars in disability studies have demonstrated the ways in which the built environment privileges some bodies and minds over others yet they have rarely examined the ways in which toxic environments engender chronic illness and disability or how environmental illnesses disrupt dominant paradigms for scrutinizing disability Designed as a reader for undergraduate and graduate courses Disability Studies and the Environmental Humanities employs interdisciplinary perspectives to examine such issues as slow violence imperialism race toxicity eco sickness the body in environmental justice ableism and other topics With a historical scope spanning the seventeenth century to the present this collection not only presents the foundational documents informing this intersection of fields but also showcases the most current work making it an indispensable reference

### **The Lure of Whitehead**

Nicholas Gaskill, A. J. Nocek, 2014-10-01 Once largely ignored the speculative philosophy of Alfred North Whitehead has assumed a new prominence in contemporary theory across the humanities and social sciences Philosophers and artists literary critics and social theorists anthropologists and computer scientists have all embraced Whitehead's thought extending it through inquiries into the nature of life the problem of consciousness and the ontology of objects as well as into experiments in education and digital media The Lure of Whitehead offers readers not only a comprehensive introduction to Whitehead's philosophy but also a demonstration of how his work advances our emerging understanding of life in the posthuman epoch Contributors Jeffrey A Bell Southeastern Louisiana U Nathan Brown U of California Davis Peter Canning Didier Debaise Free U of Brussels Roland Faber Claremont Lincoln U Michael Halewood U of Essex Graham Harman American U in Cairo Bruno Latour Sciences Po Paris Erin Manning Concordia U Montreal Steven Meyer Washington U Luciana Parisi U of London Keith Robinson U of Arkansas at Little Rock Isabelle Stengers Free U of Brussels James Williams U of Dundee

*Storytelling Apes* Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing

conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

**What Is Posthumanism?** Cary Wolfe, 2013-11-30 What does it mean to think beyond humanism Is it possible to craft a mode of philosophy ethics and interpretation that rejects the classic humanist divisions of self and other mind and body society and nature human and animal organic and technological Can a new kind of humanities posthumanities respond to the redefinition of humanity's place in the world by both the technological and the biological or green continuum in which the human is but one life form among many Exploring how both critical thought along with cultural practice have reacted to this radical repositioning Cary Wolfe one of the founding figures in the field of animal studies and posthumanist theory ranges across bioethics cognitive science animal ethics gender and disability to develop a theoretical and philosophical approach responsive to our changing understanding of ourselves and our world Then in performing posthumanist readings of such diverse works as Temple Grandin's writings Wallace Stevens's poetry Lars von Trier's *Dancer in the Dark* the architecture of Diller Scofidio and David Byrne and Brian Eno's *My Life in the Bush of Ghosts* he shows how this philosophical sensibility can transform art and culture For Wolfe a vibrant rigorous posthumanism is vital for addressing questions of ethics and justice language and trans species communication social systems and their inclusions and exclusions and the intellectual aspirations of interdisciplinarity In *What Is Posthumanism* he carefully distinguishes posthumanism from transhumanism the biotechnological enhancement of human beings and narrow definitions of the posthuman as the hoped for transcendence of materiality In doing so Wolfe reveals that it is humanism not the human in all its embodied and prosthetic complexity that is left behind in posthumanist thought

[The Minor Gesture](#) Erin Manning, 2016-05-19 In this wide ranging and probing book Erin Manning extends her previous inquiries into the politics of movement to the concept of the minor gesture The minor gesture although it may pass almost unperceived transforms the field of relations More than a chance variation less than a volition it requires rethinking common assumptions about human agency and political action To embrace the minor gesture's power to fashion relations its capacity to open new modes of experience and manners of expression is to challenge the ways in which the neurotypical image of the human devalues alternative ways of being moved by and moving through the world in particular what Manning terms autistic perception Drawing on Deleuze and Guattari's schizoanalysis and Whitehead's speculative pragmatism Manning's far reaching analyses range from fashion to depression to the writings of autistics in each case affirming the neurodiversity of the minor and the

alternative politics it gestures toward *More Book Lust* Nancy Pearl, 2009-09-29 Whether you're searching for the perfect read for yourself or for a friend *More Book Lust* offers eclectic recommendations unlike those in any other reading guide available In this followup to the bestselling *Book Lust* popular librarian Nancy Pearl offers a fresh collection of 1 000 reading recommendations in more than 120 thematic intelligent and wholly entertaining reading lists For the friend wanting to leave her job *Living Your Dream* offers good armchair dreaming books about people who have left stodgy jobs to do what they love Are you a budding chef *Fiction For Foodies* includes books that sneak in a recipe or two along with a tantalizing plot For the James Bond wannabe *Crime is a Globetrotter* features crime novels set in various locations around the world such as Tibet Sweden and Sicily In the book's introduction Pearl jokes If we were at a twelve step meeting together I would have to stand up and say Hi I'm Nancy P and I'm a readaholic *Booklist* magazine plays off this obsession while echoing a sentiment of Nancy Pearl's fans everywhere A self-confessed readaholic Pearl lets us benefit from her addiction May she never seek recovery Indeed *Loving Animals* Kathy Rudy, 2011-08-11 In a book aimed at advocates the author argues that in order to end animal cruelty activists need to better understand the profound emotional attachment many people have with animals

*Becoming Disabled* Jan Doolittle Wilson, 2021-06-28 Using an autoethnographic approach as well as multiple first person accounts from disabled writers artists and scholars Jan Doolittle Wilson describes how becoming disabled is to forge a new consciousness and a radically new way of viewing the world In *Becoming Disabled* Wilson examines disability in ways that challenge dominant discourses and systems that shape and reproduce disability stigma and discrimination It is to create alternative meanings that understand disability as a valuable human variation that embrace human interdependency and that recognize the necessity of social supports for individual flourishing and happiness From her own disability view of the world Wilson critiques the disabling impact of language media medical practices educational systems neoliberalism mothering ideals and other systemic barriers And she offers a powerful vision of a society in which all forms of human diversity are included and celebrated and one in which we are better able to care for ourselves and each other *Normativity and Naturalism in the Philosophy of the Social Sciences* Mark Risjord, 2016-01-22 Normativity and Naturalism in the Social Sciences engages with a central debate within the philosophy of social science whether social scientific explanation necessitates an appeal to norms and if so whether appeals to normativity can be rendered scientific This collection brings together contributions from a diverse group of philosophers who explore a broad but thematically unified set of questions many of which stem from an ongoing debate between Stephen Turner and Joseph Rouse both contributors to this volume on the role of naturalism in the philosophy of the social sciences Informed by recent developments in both philosophy and the social sciences this volume will set the benchmark for contemporary discussions about normativity and naturalism This collection will be relevant to philosophers of social science philosophers interested in the rule following and metaphysics of normativity and theoretically oriented social scientists *Contentment in "Songs of the Gorilla Nation: My Journey Through*
