The text at hand provides a comprehensive and accessible introduction to the topics of music search retrieval and recommendation from an academic perspective It will not only allow those new to the field to quickly access MIR from an information retrieval point of view but also raise awareness for the developments of the music domain within the greater IR community In this regard Part I deals with content based MIR in particular the extraction of features from the music signal and similarity calculation for content based retrieval Part II subsequently addresses MIR methods that make use of the digitally accessible cultural context of music Part III addresses methods of collaborative filtering and user aware and multi modal retrieval while Part IV explores current and future applications of music retrieval and recommendation Music Library and Research Skills Jane Gottlieb, 2017 Concise and engaging this text covers a wide range of reference sources for research in all genres of music Through this practical

introduction to the key concepts of music research students will develop a firm understanding of the tools used to gather data including what types of sources exist how they are arranged and how they may best be used to do research
