The Bazaar in the Islamic City Mohammad Gharipour, 2012 The Middle Eastern bazaar is much more than a context for commerce the studies in this book illustrate that markets regardless of their location scale and permanency have also played important cultural roles within their societies reflecting historical evolution industrial development social and political conditions urban morphology and architectural functions This interdisciplinary volume explores the dynamics of the bazaar with a number of case studies from Cairo Damascus Aleppo Nablus Bursa Istanbul Sana a Kabul Tehran and Yazd Although they share some contextual and functional characteristics each bazaar has its own unique and fascinating history traditions cultural practices and structure One of the most intriguing aspects revealed in this volume is the thread of continuity from past to present exhibited by the bazaar as a forum where a society meets and intermingles in the practice of goods exchange a social and cultural ritual that is as old as human history Carthage and Tunis Douglas Brooke Wheelton Sladen, 1906

The Emergence of a National Market in Spain, 1650-1800 Guillermo Perez Sarrion,2016-06-16 Awarded the Jaume Vicens Vives Prize by the Spanish Association of Economic History this study analyses the development of the Spanish domestic market from 1650 to 1800 which transformed the country from a pseudocolonial territory politically and economically dependent on its European neighbours to a significant European power The Emergence of a National Market in Spain 1650 1800 places Spain firmly in a European context arguing that the origins of a sophisticated economy must be understood through the complex diplomacy of the period namely the competition between Britain and France for dominance in the Iberian peninsula It was in response to this rivalry that the Spanish state actively promoted the conditions for economic development in the 18th century aided by autonomous commercial networks of Catalan merchants Navarrese tradesmen and migrant French businessmen This original interpretation by one of Spain s leading economic historians available in English for the first time is indispensable reading for students and scholars of Spanish history

Smith, 2012-01-01 For the first time in the history of the planet more than half the population 3 3 billion people are now living in cities Two hundred years ago only 3 per cent of the world s population were urbanites a figure that had remained fairly stable give or take the occasional plague for about 1000 years By 2030 60 per cent of us will be urban dwellers City is the ultimate handbook for the archetypal city and contains main sections on History Customs and Language Districts Transport Money Work Tourist Sites Shops and markets Nightlife etc and mini essays on anything and everything from Babel Tenochtitl n and Ellis Island to Beijing Mumbai and New York and from boulevards suburbs shanty towns and favelas to skylines urban legends and the sacred Drawing on a wide range of examples from cities across the world and throughout history it explores the reasons why people first built cities and why urban populations are growing larger every year City is illustrated throughout with a range of photographs maps and other illustrations *concepts* Bernd Herzogenrath, 2022-12-01 This book foregrounds that English monolingualism reduces both our linguistic and conceptual resources presenting concepts from the cultures of 4 continents and 26 languages Concepts seem to work best when created in the interspace between theory and praxis and between philosophy art and science Deleuze himself had generated many concepts in this encounter between philosophy and non philosophy including his ideas of affects and percepts of becoming the stutter the rhizome movement image and time image the rhizome What happens if instead of other disciplines we take other cultures other languages other philosophies Does not the focus on English as a hegemonic language of academic discourse deny us a plethora of possibilities of possible Denkfiguren of possible concepts Each contributor explores ideas that are key to thinking in their language about sound and

silence voice and image living and thinking the self and the world while simultaneously addressing the issue of translation Each chapter demonstrates that translation itself is a way of invention rather than just a rendering of concepts from one system in terms of another This collection acts as a travelogue The journey does not follow a particular trajectory some countries are not on the map some are visited twice So there is no claim to completeness involved here it is rather an invitation to answer to the call
