Sound, Music and Movement in Parkinson's Disease Marta M. N. Bieńkiewicz,Cathy Craig,2017-01-05 Recent years have brought new insights to the understanding of Parkinson s disease impact of exercise and sound displays in rehabilitation and movement facilitation There is growing evidence that auditory signals in the environment can provide a temporal template for movement and change the mode of motor control from intrinsic to extrinsic habitual to goal directed enabling enhanced motor performance in patients In addition forced exercise rate studies show that exercising at the pace of healthy adults can have potential neuroprotective

benefits for patients Many research groups have explored the use of auditory cues such as rhythmical auditory training in improving gait and upper limb movement parameters Cues are usually either intermittent metronome or continuous dynamic sound displays Similarly dance based interventions suggest that patients benefit from additional sensory information i e the temporal structure embedded in music and proprioceptive information from a dancing partner that facilitates movement On the contrary studies dedicated to auditory perception and motor timing report an impaired ability of patients to perceive and synchronise with complex rhythmical structures i e causing an inability to play musical instruments With the growth of modern technology and the increasing portability of high specification devices such as smart phones new research questions on the design of interventions are beginning to emerge as we strive for more efficient therapeutic approaches In this Research Topic we wanted to bring together top scientists from the movement disorder motor control and sound related studies along with therapists That way we can engage in cross disciplinary and challenging scientific debate about future rehabilitation avenues and frontiers for Parkinson s disease patients

Sound Kathryn Kalinak,2015-05-01 Sound has always been an integral component of the moviegoing experience Even during the so called silent era motion pictures were regularly accompanied by live music lectures and sound effects Today whether we listen to movies in booming Dolby theaters or on tiny laptop speakers sonic elements hold our attention and guide our emotional responses Yet few of us are fully aware of the tremendous collaborative work involving both artistry and technical wizardry required to create that cinematic soundscape Sound the latest book in the Behind the Silver Screen series introduces key concepts seminal moments and pivotal figures in the development of cinematic sound Each of the book s six chapters cover a different era in the history of Hollywood from silent films to the digital age and each is written by an expert in that period Together the book s contributors are able to explore a remarkable range of past and present film industry practices from the hiring of elocution coaches to the marketing of soundtrack records Not only does the collection highlight the achievements of renowned sound designers and film composers like Ben Burtt and John Williams it also honors the unsung workers whose inventions artistry and performances have shaped the soundscapes of many notable movies After you read Sound you ll never see or hear movies in quite the same way Sound is a volume in the Behind the Silver Screen series other titles in the series include Acting Animation Art Direction and Production Design Cinematography Costume Makeup and Hair Directing Editing and Special Visual Effects Producing and Screenwriting

The Sufi Message of Hazrat Inayat Khan: The Mysticism of Sound, Music, The Power of the Word, Cosmic Language Hazrat Inayat Khan,2020-09-28 In this volume the second of The Sufi Message of Hazrat Inayat Khan an attempt has been made to group together most of the Sufi mystic s teaching concerning sound and music sound as the basis of creation and music as an essential means towards spiritual development Having been a musician of renown before he gave up his art in order to dedicate himself entirely to the Sufi

Message with which he was entrusted Inayat Khan readily followed the practice of the ancient Sufis in expressing esoteric truths in terms of sound and music He once described this as follows I gave up my music because I had received from it all that I had to receive To serve God one must sacrifice what is dearest to one and so I sacrificed my music I had composed songs I sang and played the vina and practicing this music I arrived at a stage where I touched the Music of the Spheres Then every soul became for me a musical note and all life became music Inspired by it I spoke to the people and those who were attracted by my words listened to them instead of listening to my songs Now if I do anything it is to tune souls instead of instruments to harmonize people instead of notes If there is anything in my philosophy it is the law of harmony that one must put oneself in harmony with oneself and with others I have found in every word a certain musical value a melody in every thought harmony in every feeling and I have tried to interpret the same thing with clear and simple words to those who used to listen to my music I played the vina until my heart turned into this very instrument then I offered this instrument to the divine Musician the only musician existing Since then I have become His flute and when He chooses He plays His music The people give me credit for this music which in reality is not due to me but to the Musician who plays on His own instrument

Scholars consider sound and its concepts taking as their premise the idea that popular culture can be analyzed in an innovative way through sound The wide ranging texts in this book take as their premise the idea that sound is a subject through which popular culture can be analyzed in an innovative way From an infant's gurgles over a baby monitor to the roar of the crowd in a stadium to the sub bass frequencies produced by sound systems in the disco era sound not necessarily aestheticized as music is inextricably part of the many domains of popular culture Expanding the view taken by many scholars of cultural studies the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as material physical perceptual and sensory processes that integrate a multitude of cultural traditions and forms of knowledge The chapters discuss conceptual issues as well as terminologies and research methods analyze historical and contemporary case studies of listening in various sound cultures and consider the ways contemporary practices of sound generation are applied in the diverse fields in which sounds are produced mastered distorted processed or enhanced The chapters are not only about sound they offer a study through sound echoes from the past resonances of the present and the contradictions and discontinuities that suggest the future Contributors Karin Bijsterveld Susanne Binas Preisendörfer Carolyn Birdsall Jochen Bonz Michael Bull Thomas Burkhalter Mark J Butler Diedrich Diederichsen Veit Erlmann Franco Fabbri Golo Fllmer Marta García Quiñones Mark Grimshaw Rolf Grömann Maria Hanek Thomas Hecken Anahid Kassabian Carla J Maier Andrea Mihm Bodo Mrozek Carlo Nardi Jens Gerrit Papenburg Thomas Schopp Holger Schulze Toby Seay Jacob Smith Paul Thiberge Peter Wicke Simon Zagorski Thomas

From Music to Sound Makis Solomos, 2019-10-28

From Music to Sound is an examination of the six musical histories whose convergence produces the

emergence of sound offering a plural original history of new music and showing how music had begun a change of paradigm moving from a culture centred on the note to a culture of sound Each chapter follows a chronological progression and is illustrated with numerous musical examples The chapters are composed of six parallel histories timbre which became a central category for musical composition noise and the exploration of its musical potential listening the awareness of which opens to the generality of sound deeper and deeper immersion in sound the substitution of composing the sound for composing with sounds and space which is progressively viewed as composable The book proposes a global overview one of the first of its kind since its ambition is to systematically delimit the emergence of sound Both well known and lesser known works and composers are analysed in detail from Debussy to contemporary music in the early twenty first century from rock to electronica from the sound objects of the earliest musique concrète to current electroacoustic music from the Poème électronique of Le Corbusier Varèse Xenakis to the most recent inter arts attempts Covering theory analysis and aesthetics From Music to Sound will be of great interest to scholars professionals and students of Music Musicology Sound Studies and Sonic Arts Supporting musical examples can be accessed via the online Routledge Music Research Portal
