shaped much of the land as we know it Here is the whole world of ice from the freezing of Pleasant Lake in New Hampshire to the breakup of a Vermont river at the onset of spring from the frozen Antarctic landscape that emperor penguins inhabit to the cold watery route bowhead whales take between Arctic ice floes Mariana Gosnell writes about frostbite and about the recently discovered 5 000 year old body of a man preserved in an Alpine glacier She discusses the work of scientists who extract cylinders of Greenland ice to study the history of the earth s climate and try to predict its future She examines ice in plants icebergs icicles and hail sea ice and permafrost ice on Mars and in the rings of Saturn and several new forms of ice developed in labs She writes of the many uses humans make of ice including ice skating ice fishing iceboating and ice climbing building ice roads and seeding clouds making ice castles ice cubes and iced desserts Ice is a sparkling illumination of the natural phenomenon whose ebbs and flows over time have helped form the world we live in It is a pleasure to read and important to read for its natural science and revelations about ice s influence on our everyday lives and for what it has to tell us about our environment today and in the future
