It also contains a multimedia device with the full texts of the lectures presented at the conference including the 5 keynote lectures and almost 150 selected contributions. The contributions on creative and scientific aspects in the conception and construction of structures on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific technical and practical novelties in both fields. ICSA2019 covered all major aspects of structures and architecture including building envelopes, a wide comprehension of complex forms, computer and experimental methods, futuristic structures, concrete and masonry structures, educating architects and structural engineers, emerging technologies, glass structures, innovative architectural and structural design, lightweight and membrane structures, special structures, steel and composite structures, structural design challenges, tall buildings, the borderline between architecture and structural engineering, the history of the relationship between architects and structural engineers, the tectonic of architectural solutions, the use of new materials, timber structures among others. This set of book and multimedia device is intended for a global readership of researchers and practitioners including architects, structural and construction engineers, builders and building consultants, contractors, material suppliers and product manufacturers and other professionals involved in the design and realization of architectural, structural and infrastructural projects.

L'Enactivisme Giegelmann Eric, 2025-09-26 *Si notre esprit n'est pas un simple processeur d'informations mais une réalité vivante enracinée dans le corps et façonnée par nos interactions avec le monde*. L'enactivisme propose une vision radicalement nouvelle de la cognition : nous ne percevons pas passivement, nous enactons activement notre réalité traversant nos actions, nos relations et notre environnement. De la philosophie à la psychologie, de l'éducation à la santé, de la création à la société future, ce livre explore comment l'enactivisme transforme notre compréhension de la conscience et de la vie. Il dévoile des applications concrètes pour le bien-être personnel : la résilience, l'innovation technologique et la construction d'un monde plus connecté et conscient. La croissance des sciences de la philosophie et du développement personnel cet ouvrage est une invitation à repenser notre manière de exister. Une exploration accessible et inspirante pour tous ceux qui cherchent à comprendre et à vivre une interaction profonde entre l'esprit, le corps et le monde. Un livre pour agir, percevoir et créer une existence plus riche et plus significative.
