Midlarsky, 2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies
