Terrorism: Bridging the Gap with Peace and Conflict Studies Ioannis Tellidis, Harmonie Toros, 2016-01-08 This book opens up the discussion of the interrelation between terrorism studies and peace and conflict studies The aim is to examine the instances and circumstances under which both fields can benefit from each other Even though it is often accepted that terrorism is a form of political violence it is also quite frequent that research on the topic is dismissed when it is approached with conflict analysis frames More importantly policy approaches continue to inhibit obstruct and reject frameworks that are concerned with the transformation and resolution of terrorist conflicts partly because they see the state as the ultimate referent object to be secured At the same time peace and conflict studies seem to be excessively focused on problem solving approaches which overemphasise the role of parity during negotiations and misdiagnose the distribution of power both within conflicts as well as within conflict management resolution and or transformation approaches This book was published as a special issue of *Critical Studies on Terrorism*

Terror, Security, and Money John Mueller, Mark G. Stewart, 2011-10-07 In seeking to evaluate the efficacy of post 9 11 homeland security expenses which have risen by more than a trillion dollars not including war costs the common query has been Are we safer This however is the wrong question Of course we are safer the posting of a single security guard at one building's entrance enhances safety The correct question is Are any gains in security worth the funds expended In this engaging readable book John Mueller and Mark Stewart apply risk and cost benefit evaluation techniques to answer this very question This analytical approach has been used throughout the world for decades by regulators academics and businesses but as a recent National Academy of Science study suggests it has never been capably applied by the people administering homeland security funds Given the limited risk terrorism presents expenses meant to

lower it have for the most part simply not been worth it For example to be considered cost effective increased American homeland security expenditures would have had each year to have foiled up to 1 667 attacks roughly like the one intended on Times Square in 2010 more than four a day Cataloging the mistakes that the US has made and continues to make in managing homeland security programs Terror Security and Money has the potential to redirect our efforts toward a more productive and far more cost effective course
