Terrorism Drugs And Crime In Europe After 199:

International Relations Theory and the Politics of European Integration Morten Kelstrup, Michael Williams, 2006-12-05

International Relations Theory and the Politics of European Integration focuses on the roles of community power and security within the European Union. It features contributions from highly respected international scholars and covers subjects such as sovereignty and European integration, the EU and the politics of migration, the internationalisation of military security, the EU as a security actor, money, finance and power, the quest for legitimacy with regards to EU enlargement, Crime-terror Alliances and the State Lyubov Grigorova, Ted Robert Gurr, 2013. This new book by Lyubov Mincheva and Ted Gurr examines the political economy of transborder violence on the European Periphery that poses grave threats to domestic and international security in Europe and elsewhere. The units of analysis are unholy alliances, i.e. hybrid transborder militant and criminal networks which have been active in the 1990s and the first decade of the 2000s. The concept of Unholy Alliances is extended to also include the trans-state criminal syndicates that arise in failed and dysfunctional states or operate within the global illicit economy. It also addresses the question of what reigns supreme in securing the militants' long-term success: money or social endowment including strong identity networks.

World Terrorism: An Encyclopedia of Political Violence from Ancient Times to the Post-9/11 Era James Ciment, 2015-03-10. First Published in 2015. This collection holds three volumes. Terrorism is a term that defies easy definition and its meaning has also changed over the course of history. Because this encyclopedia aims at comprehensiveness across time, geography and the conceptual landscape, it applies the broadest definition of terrorism: the use of violence or the threat of violence to effect political change through fear in which the victims of the violence are the innocent. The encyclopedia is divided into six parts. *Identifying Security Logics in the EU Policy Discourse* Maciej Stępką, 2022-02-10. This open access book investigates the complexity and the modalities of securitization of migration and border control at the EU level. It discusses and compares how different EU institutions and agencies have been deploying different logics of security, e.g. humanitarianism or management of risk, while framing increased migratory flows and so-called migration crisis as a security problem. The book argues that the re-development of EU migration and border control policies in response to increased migratory flows of 2015 have revealed an increasingly tangled nature of securitization of migration in the EU. This is reflected in the intertwining of security logics where migrants and human mobility tend to be securitized through different, sometimes multiple, interpretative lenses at different stages of policy framing. From a theoretical point of view, the book develops a fresh analytical perspective that further contributes to the burgeoning discussion on securitization theory. By bridging the literature on policy framing and securitization, it makes a significant contribution to the debates on both securitization and migration. As such, this book is of great interest to students, academics, policy makers and all those working in the fields of EU politics, migration, security and international relations.
