## **Terrorist Praha 2002 Issue 5:**

**Terror in Chechnya** Emma Gilligan, 2013-12-01 A riveting history of Russia's crimes in Chechnya Terror in Chechnya is the definitive account of Russian war crimes in Chechnya Emma Gilligan provides a comprehensive history of the second Chechen conflict of 1999 to 2005 revealing one of the most appalling human rights catastrophes of the modern era one that has yet to be fully acknowledged by the international community Drawing upon eyewitness testimony and interviews with refugees and key political and humanitarian figures Gilligan tells for the first time the full story of the Russian military's systematic use of torture disappearances executions and other punitive tactics against the Chechen population In Terror in Chechnya Gilligan challenges Russian claims that civilian casualties in Chechnya were an unavoidable consequence of civil war She argues that racism and nationalism were substantial factors in Russia's second war against the Chechens and the resulting refugee crisis She does not ignore the war crimes committed by Chechen separatists and pro Moscow forces Gilligan traces the radicalization of Chechen fighters and sheds light on the Dubrovka and Beslan hostage crises demonstrating how they undermined the separatist movement and in turn contributed to racial hatred against Chechens in Moscow A haunting testament of modern day crimes against humanity Terror in Chechnya also looks at the international response to the conflict focusing on Europe's humanitarian and human rights efforts inside Chechnya , **Terrorism and the UN** Jane Boulden, Thomas G. Weiss, 2004-03-16 How has the United Nations dealt with the question of terrorism before and after September 11 What does it mean that the UN itself has become a target of terrorism Terrorism and the UN analyzes how the UN's role in dealing with terrorism has been shaped over the years by the international system and how events such as September 11 and the American intervention in Iraq have reoriented its approach to terrorism The first half of the book addresses the international context Chapters in this part consider the impact of September 11 on the UN's concern for the rights and security of states relative to those of individuals as well as the changing attitudes of various Western powers toward multilateral vs unilateral approaches to international problems The second half of the book focuses more closely on the UN its values mechanisms and history and its future role in preventing and reacting to terrorism The Security Council's position on and reactions to terrorist activities are contrasted with the General Assembly's approach to these issues What role the UN might play in suppressing the political economy of terrorism is considered A concluding chapter looks at broader more proactive strategies for addressing the root causes of terrorism with an emphasis on social justice as a key to conflict prevention a primary concern of the UN particularly the General Assembly before September 11 Contributors are Jane Boulden Chantal de Jonge Oudraat Georgetown University Edward C Luck Columbia University S Neil MacFarlane University of Oxford Rama Mani Geneva Centre for Security Policy M J Peterson University of Massachusetts Amherst Nico Schrijver Vrije Universiteit Amsterdam Mónica Serrano Colegio de México and University of Oxford Thierry Tardy Geneva Centre for Security Policy Karin von Hippel King's College London and Thomas G Weiss *The Fight Against Terrorism and*

*Crisis Management in the Western Balkans* I. Prezelj, 2008-02-06 Terrorism is not the only threat that causes the emergence of crises The so called crisification of our security environment also seems to be rising due to many other factors Such an environment is generating many crises related to politico military conflicts natural disasters infectious diseases information disruptions ethnic or religious violence and others Many of these crises are completely or nearly completely unexpected and have a strong effect on the security of individual people states and the international community Crisis has become the key word instead of war The awareness of this is partially driven by the growing role of electronic media bringing negative news and reports to nearly all homes and partially by objective technical factors that allow the fast escalation of local crises to the international level Globalization therefore has a strong subjective and objective impact on the understanding of security

**Index Medicus** ,2003 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings **Martyrdom and Sacrifice in Islam** Meir Hatina, 2016-11-14 Over the years the belief system around self sacrifice has become key to understanding the Middle East and its political relationships with the West although much of the literature and conversation has been restricted to modern concepts of jihadism The recent spate of scholarship relating to suicide bombers and jihadists studies these concepts without a broader understanding of the principle of martyrdom This book expands on the chronology of self sacrifice within Islam and contextualises the use of suicide bombings using details of the rise of martyrdom in places such as Iraq Lebanon Chechnya and Pakistan It historicises the background in which jihad has been glorified while also exploring contemporary methods of recruitment like the use of the internet The authors pay close attention to the different sects and factions of Islam and the differing interpretations of jihad that accompany these ideologies In the current political climate a book that explores martyrdom within the framework of historical perspectives geographical regions and the influence of outside cultures is essential *The Global Politics of Combating Nuclear Terrorism* William C. Potter, Cristina Hansell, 2013-09-13 The most difficult challenge for a terrorist organization seeking to build a nuclear weapon or improvised nuclear device is obtaining fissile material either plutonium or highly enriched uranium HEU Experts acknowledge that obtaining HEU uranium that has been processed to increase the proportion of the U 235 isotope to over 20% is the most difficult challenge facing a state or non state actor seeking to build a nuclear explosive The large stocks of HEU in civilian use many not adequately protected are thus one of the greatest security risks facing the global community at present This book contains chapters examining the various uses for this material and possible alternatives the threat posed by this material the economic political and strategic obstacles to international efforts to end the use of HEU for commercial and research purposes as well as new national and international measures that should be taken to further the elimination of HEU This book was published as a special issue of *The Nonproliferation Review* *Terrorism and the International Business Environment* Gabriele G. S. Suder, 2004-01-01 The volume reveals how the pre 9 11 era of contemporary economic history gave birth to a nexus of a globalization b increased systemic vulnerability and complexity and c the transitions of terrorism

As a result the post 9 11 era is one which should incorporate risk analysis audits on a regular basis political and geopolitical risk research the use of quantitative risk assessment and qualitative risk analysis to implement risk strategy planning its management and appropriate risk transfer considerations *Globalisation and the Future of Terrorism* Brynjar

Lia,2007-05-07 This new study is devoted to understanding how international terrorism is shaped how it evolves and what we can expect in the future Drawing upon research and methods outside the traditional focus and by taking both a theoretical approach and a new practical predictive perspective it delivers a fresh and fascinating contribution to terrorism studies While predicting terrorism is a highly speculative business there are ways of identifying certain long term causes driving forces and their links with society Terrorists are usually integral players in local and sometimes global politics Hence when the local regional and international contexts change so does terrorism Thoroughly reviewing the body of literature on the causes of terrorism this study also combines predictive and futuristic analyses on globalisation supported by a range of key case studies It spans from the transformation of international relations the globalisation of the market economy demographic factors ideological shifts and technological changes The result is a set of key conclusions about the future patterns of terrorism which are not simply best guesses but also backed up by solid research This book will be of great interest to all students and scholars of terrorism globalisation politics and international relations **Islamist Insurgents on the Defensive** Dave Dilegge,2018-02-28 This work is the fourth Small Wars Journal anthology focusing on radical Sunni Islamic terrorists and insurgent groups It covers this professional journals writings for 2016 and is a compliment to the earlier Global Radical Islamist Insurgency anthologies that were produced as Vol I 20072011 published in 2015 and Vol II 20122014 published in 2016 and Jihadi Terrorism Insurgency and the Islamic State spanning 2015 published in 2017 This anthology which offers well over six hundred pages of focused analysis follows the same general conceptual breakdown as the earlier works and is divided into two major thematic sections one focusing on al Qaeda and Islamic state activities in 2016 and the other focusing on US Allied policies and counterinsurgent strategies Research Handbook on NATO Sebastian

Mayer,2023-07-01 This timely Research Handbook provides novel insights into the institutional complexities of the North Atlantic Treaty Organization NATO Through a defined focus on the post Cold War evolution of NATO it provides various theoretical perspectives on the Alliance and assesses wider research efforts within NATO studies **Nuclear Terrorism and Global Security** Alan J. Kuperman,2013-04-17 This book examines the prospects and challenges of a global phase out of highly enriched uranium and the risks of this material otherwise being used by terrorists to make atom bombs Terrorist groups such as Al Qaeda have demonstrated repeatedly that they seek to acquire nuclear weapons Unbeknownst even to many security specialists tons of bomb grade uranium are trafficked legally each year for ostensibly peaceful purposes If terrorists obtained even a tiny fraction of this bomb grade uranium they could potentially construct a nuclear weapon like the one dropped on Hiroshima that killed tens of thousands Nuclear experts and policymakers have long known of this danger

but so far have taken only marginal steps to address it This volume begins by highlighting the lessons of past successes where bomb grade uranium commerce has been eliminated such as from Argentina s manufacture of medical isotopes It then explores the major challenges that still lie ahead for example Russia s continued use of highly enriched uranium HEU in dozens of nuclear facilities Each of the book s thirteen case studies offers advice for reducing HEU in a specific sector These insights are then amalgamated into nine concrete policy recommendations for U S and world leaders to promote a global phase out of bomb grade uranium This book will be of much interest to students of nuclear proliferation global governance international relations and security studies      Political Manipulation and Weapons of Mass Destruction Ben Cole,2017-12-11

Concerns about CBRN Chemical Biological Radioactive Nuclear weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9 11 This book provides a chronological account of al Qaeda s efforts to acquire a CBRN weapon capability and the evolution of the al Qaeda leadership s approach to actually using CBRN weapons set against the context of the politicisation of the threat of CBRN terrorism in US security debates Ben Cole explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda s approach to CBRN weapons and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies particularly the 2003 invasion of Iraq He assesses the relative success of the al Qaeda leadership s political approach to CBRN weapons together with the relative success of efforts by the US UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes Shedding new light on al Qaeda s tactics and strategy this book will be essential reading for scholars of terrorism and extremism studies      Legal Instruments in the Fight Against International Terrorism Cyrille J.C.F. Fijnaut,Jan Wouters,Frederik Naert,2004-06-01 This book finds its origins in a transatlantic colloquium held in the European Parliament in Brussels in May 2002 After an introductory overview of the US and European responses to 9 11 it addresses the main legal aspects of the fight against international terrorism namely police and judicial cooperation including mutual legal assistance extradition and the role of entities like Europol and Eurojust financial initiatives e g by the UN Security Council the FATF and the EU human rights and rule of law issues such as trial by military commissions detention of alleged unlawful combatants and others state of emergency derogations due process the death penalty and privacy and international law aspects inter alia self defence the application of international humanitarian law prisoner of war status the role of the UN in particular the Security Council sanctions and the negotiations on a comprehensive convention on combating terrorism Each topic is considered from a US and from a European perspective      NAFTA & Neocolonialism Laurence French,Magdaleno Manzanárez,2004-10-22 This work is a study of the impacts of the North American Free Trade Agreement NAFTA By focusing on the issue of justice in the contexts of globalization and neo colonialism the book contributes to a broader discussion of the significance of NAFTA Authors Laurence French and Magdaleno Manzan rez emphasize cultural and ethnic

issues in the relations of NAFTA partners and enrich treatment of the topic by bringing to bear sociology political science justice studies psychology and educational theory The authors relate classical sociological theory to contemporary issues of social and criminal justice      Report on the Foreign Policy of the Czech Republic ,2003-01-01      *New Actors and Issues in the Post-Arab Uprisings Period* Duygu Ersoy,Jülide Karakoç,2016-05-11

The Arab uprisings that emerged in reaction to unemployment high inflation corruption and the lack of liberty under authoritarian rule in the Middle East and North Africa paved the way for social and political transformations in the region As a consequence of these uprisings new actors have gained prominence while regional issues have become more aggravated and complicated challenging existing national borders The involvement of a broad range of regional and external actors in various parts of the region has created new conflicts and alliances *New Actors and Issues in the Post Arab Uprisings* examines how the post Arab uprisings period with its diversity of issues and actors challenges existing policies and national borders in the Middle East This collection provides readers with a deeper understanding of the political and social changes that are underway through diverse perspectives on various critical issues      **EU Counterterrorism Policy** Oldrich Bures,2016-04-22

Although there is a vast body of literature covering the ongoing debates concerning the novelty and gravity of the contemporary terrorist threat as well as the most appropriate response to it few authors have thus far analysed the complex set of counterterrorism measures that both the individual Member States and the European Union EU have attempted to develop This volume offers a critical analysis of the measures the European Union has taken to combat terrorism and how in a number of key areas EU counterterrorism policy is more of a paper tiger than an effective counterterrorism device Several legal EU counterterrorism instruments have not been properly implemented at the national level and questions have been raised regarding their effectiveness appropriateness and proportionality The capabilities of EU agencies in the area of counterterrorism remain rather weak and the EU

Counterterrorism Coordinator does not have any real powers apart from persuasion However this does not mean that EU level action cannot offer any value added in the fight against terrorism There are several areas where the EU can provide genuine value added in the fight against terrorism due to the transnational nature of the contemporary terrorist threat and the nature of a borderless Europe      **Stalinist Terror in Eastern Europe** Kevin McDermott,Matthew Stibbe,2024-06-04

This wide ranging collection of essays newly available in paperback is the first book in English to examine the impact of Stalinist terror on Eastern Europe in the years 1940 to 1956 Covering the Baltic states Moldavia East Germany Poland Czechoslovakia Hungary Romania Yugoslavia Bulgaria and Albania the authors investigate terror both from above in the form of elite purges and show trials and from below in the guise of large scale arrests and deportations of ordinary people Key questions addressed include the relative importance of Soviet influence versus local factors the persecution of particular groups such as kulaks church leaders the middle class intelligentsia and members of non communist left wing parties cases where repression was more or conversely less intense than elsewhere and the relevance of key events such as the Tito Stalin

split of 1948 the Rajk trial of 1949 and the Sl nsk trial of 1952
