Testing And Evaluation Of Drugs Of Abuse:

Testing and Evaluation of Drugs of Abuse Martin W. Adler, Alan Cowan, 1990-05-29 This work describes how critical biological information on today's abused drugs is obtained in both laboratory and clinical settings. Recent methodological advances, both great and small, are presented in a concise manner by experienced researchers and scholars. The text covers wholesale innovations in methodology in addition to simple modifications of existing methods that often yield great advances, and the strengths and weaknesses of all methods are assessed. The survey is comprehensive and uncovers key characteristics of abused drugs at the receptor level on animal behavior and in humans. The SAGE Handbook of Drug & Alcohol Studies

Kim Wolff, Jason White, Steven Karch, 2016-10-18 With contributions from leading international academics across the biological sciences, this handbook takes a critical look at the key contemporary issues and debates in the field. The 31 chapters are divided into four parts: Part I Determination of Substance Misuse; Part II PK and PD in Relation to Patterns of Use; Part III Detection and Treatment of Drug and Alcohol Use; Part IV Controversies and New Approaches. This Handbook is an excellent reference text for the growing number of academics, students, scientists, and practitioners in the drug and alcohol studies community and will be a vital resource to the allied professions involved in workplace drug testing, clinical toxicology, and forensic science.
