Independent Inventor's Handbook explains everything a potential inventor needs to know and the tools he or she needs to use to take a raw concept and turn it into reality. Written by Louis J. Foreman, creator of the PBS series *Everyday Edisons* and a holder of multiple patents, together with patent attorney Jill Gilbert Welytok, here's a book that speaks directly to the inventive American: the entrepreneur, the tinkerer, the dreamer, the basement scientist, the stay-at-home mom who figures out how to do it better. Over one million of them file patents each year. Here is everything a future inventor needs: Understanding the difference between a good idea and a marketable idea; Why investing too much money at the outset can sink you; The downside of design patents and how best to file an application for a utility patent; Surveys, online test runs, and other strategies for market research on a tight budget; Plus the effective pitch; Hint: never say your target audience is everyone; questions to ask a prospective manufacturer; 14 licensing land mines to avoid; looks like versus works like; prototypes; Ten Things Not to Tell a Venture Capitalist; and how to protect your invention once it's on the market. Appendices include a glossary of legal manufacturing and marketing terms, a sample nondisclosure agreement, and a patent application deconstructed.
