The Ionian Islands In The Bronze And Early Iron Ages:

The Ionian Islands in the Bronze Age and Early Iron Age, 3000-800 BC Christina

Souyoudzoglou-Haywood,1999-01-01 It is always interesting to read studies of insular or isolated groups or environments and to speculate on why they do not tend to mirror changes in neighbouring areas This book studies the archaeological evidence during the period 3000 800 BC the settlements cemeteries artefacts and environment of each individual island In a concluding chapter the islands are studied as a group looking at general sequences of historical and cultural development and the role of foreign outside influences in accounting or contributing to these changes A clear and well illustrated archaeological study

The Ionian Islands in the Bronze Age and Early Iron Age Christina

Souyoudzoglou-Haywood,2025-08-05 The central Ionian Islands occupy a special geographical position in the eastern Mediterranean On the one hand they face and are in close proximity to the western Greek mainland and on the other they are connected with the western Balkans and the central Mediterranean through the Ionian and Adriatic seas Although with the exception of Corfu they were integrated in the Aegean cultural sphere of influence throughout the Bronze Age and Early Iron Age their marginal position and insularity also contributed to the formation of particular sociocultural identities individually and as a group On occasions these conditions also made them highly desirable as spaces for wide ranging maritime based interactions and inter cultural exchanges Culturally the islands remained above all a part of the western periphery of the Aegean world pulsing to its major changes and upheavals In the twenty years since the first edition of The Ionian Islands in the Bronze Age and Early Iron Age came out there has been a significant surge of interest in peripheries and their role in the construction of cultural and historical narratives about Greece over the centuries Yet the Ionian Islands have by and large been left behind in these discussions This fully revised second edition of the book incorporates all the recent discoveries and studies as well as updating a large part of the earlier evidence and aims to bring the islands back to the centre of debates and showcase their relevance

Material Koinai in the Greek Early Iron Age and Archaic Period Anastasia

Gadolou,Soren Handberg,2017-02-01 The ancient Greek word koine was used to describe the new common language dialect that became widespread in the ancient Greek world after the conquests of Alexander the Great Modern scholars have increasingly used the word to conceptualise regional homogeneities in the material culture of the ancient Mediterranean In this volume twenty scholars from various disciplines present case studies that focus on the fundamental question of how to perceive and the social and cultural mechanisms that led to the spread and consumption of material culture in the Greek early Iron Age Combined the chapters provide a critical examination of the use of the koine concept as a heuristic tool in historical research and discuss to what degree similarities in material culture reflect cultural connections The volume will be of interest scholars interested in archaeological theory and method the social significance of material culture and the history

Of Odysseys and Oddities Barry

Molloy, 2016-08-31 *Of Odysseys and Oddities* is about scales and modes of interaction in prehistory specifically between societies on both sides of the Aegean and with their nearest neighbors overland to the north and east The 17 contributions reflect on tensions at the core of how we consider interaction in archaeology particularly the motivations and mechanisms leading to social and material encounters or displacements Linked to this are the ways we conceptualize spatial and social entities in past societies scales and how we learn about who was actively engaged in interaction and how and why they were modes The papers provide a broad chronological spatial and material range but taken together they critically address many of the ways that scales and modes of interaction are considered in archaeological discourse Ultimately the intention is to foreground material culture analysis in the development of the arguments presented within this volume informed but not driven by theoretical positions

Christina Souyoudzoglou-Haywood, Christina Papoulia, 2021-12-22 Presents a thematic collection of papers dealing with the Stone Age and Bronze Age archaeology of the Ionian Sea situated off the south western Balkan peninsula It is based on an international conference held in Athens Greece in January 2020 The eastern Ionian occupies a geographically complex area

which since the Pleistocene has undergone significant alterations due to tectonic activity and sea level fluctuations This dynamic environment where islands mainland and sea intertwined to present different landscapes and seascapes to the human communities exploring the region at different times in the past provides an ideal setting for their study from a diachronic perspective This book deals thematically with the processes of circulation of people materials artefacts and ideas by examining patterns of settlement burial and multi layered interconnections between the different communities via land and sea It investigates aspects of regional and interregional communication isolation collective memory and the creation of distinct identities within and between different cultural and social groups It focuses on the islands of the Central Ionian Sea offering new data from excavations and surveys on Zakynthos Kefalonia Ithaki and the smaller islands of the Inner Ionian Archipelago between Lefkada and Akarnania The cultural interchange between the islands and the continental coasts is reflected in the volume with the addition of chapters dealing with contemporary sites in west Greece and southeast Italy The Ionian often regarded as at the fringes of the Aegean the Balkan and the central Mediterranean archaeological discourse has lately offered new and exciting data that not only enrich but also alter our perceptions of mobility settlement and interaction The collection of papers in this book enhances theoretical discussions by offering a geographically and culturally comparative approach ranging from the earliest Palaeolithic evidence of human presence in the region to the end of the Bronze Age

A. Murphy, 2020-01-06 Late Bronze Age tombs in Greece and their attendant mortuary practices have been a topic of scholarly debate for over a century dominated by the idea of a monolithic culture with the same developmental trajectories throughout the region This book contributes to that body of scholarship by exploring both the level of variety and of similarity that we see in the practices at each site and thereby highlights the differences between communities that otherwise look very similar By bringing together an international group of scholars working on tombs and cemeteries on mainland Greece Crete and in the Dodecanese we are afforded a unique view of the development and diversity of these communities The papers provide a penetrative analysis of the related issues by discussing tombs connected with sites ranging in size from palaces to towns to villages and in date from the start to the end of the Late Bronze Age This book contextualizes the mortuary studies in recent debates on diversity at the main palatial and secondary sites and between the economic and political strategies and practices throughout Greece The papers in the volume illustrate the pervasive connection between the mortuary sphere and society through the creation and expression of cultural narratives and draw attention to the social tensions played out in the mortuary arena The Cycladic and Aegean Islands in Prehistory Ina Berg, 2019-02-01 This textbook offers an up to date academic synthesis of the Aegean islands from the earliest Palaeolithic period through to the demise of the Mycenaean civilization in the Late Bronze III period The book integrates new findings and theoretical approaches whilst at the same time allowing readers to contextualize their understanding through engagement with bigger overarching issues and themes often drawing explicitly on key theoretical concepts and debates Structured according to chronological periods and with two dedicated chapters on Akrotiri and the debate around the volcanic eruption of Thera this book is an essential companion for all those interested in the prehistory of the Cyclades and

The Mediterranean Context of Early Greek History Nancy H. Demand, 2012-01-17 The Mediterranean Context of Early Greek History p Drawing extensively on the latest archaeological data from the entire Mediterranean basin Nancy Demand offers a compelling argument for situating the origins of the Greek city state within a pan Mediterranean network of maritime interactions that stretches back millennia Jonathan Hall University of Chicago Nancy Demand s book is a remarkable achievement Her Heraklian labors have produced stunning documentation of the consequences of the vast spectrum of interaction between the peoples surrounding the Mediterranean Sea from the Mesolithic into the Iron Age Carol Thomas University of Washington Were the origins of the Greek city state the polis a unique creation of Greek genius Or did their roots extend much deeper Noted historian Nancy H Demand joins the growing group of scholars and historians who have abandoned traditional isolationist models of the development of the Greek polis and cast their scholarly gaze seaward to the sparkling waters of the Mediterranean The Mediterranean Context of Early Greek History reveals the role the complex interaction of Mediterranean cultures and maritime connections had in shaping and developing urbanization including the ancient Greek city states Utilizing and enhancing upon the model of the fantastic cauldron first put forth by Jean Paul Morel in 1983 Demand reveals how Greek city states did not simply emerge in isolation in remote country villages but rather sprang up along the shores of the Mediterranean in an intricate maritime network of Greeks and non Greeks alike We learn how early seafaring trade such as the development of obsidian trade in the Aegean stimulated innovations in the provision of food the Neolithic Revolution settlement organization political form materials for tool production and concepts of divinity With deep scholarly precision The Mediterranean Context of Early Greek History offers fascinating insights into the wider context of the Greek city state in the ancient world *Encyclopedia of the Ancient Greek World* David Sacks, Oswyn Murray, Lisa R. Ancient Greece Sigrid Deger-Jalkotzy, 2006-07-27 The period between the collapse of the Mycenaean civilization around 1200 BC and the dawning of the classical era four and half centuries later is widely known as the Dark Age of Greece not least in the eponymous history by A M Snodgrass published by EUP in 1971 and reissued by the Press in 2000 In January 2003 distinguished scholars from all over the world gathered in Edinburgh to re examine old and new evidence on the period The subjects of their papers were chosen in advance by the editors so that taken together they would cover the field This book based on thirty three of the presentations will constitute the most fundamental reinterpretation of the period for 30 years The authors take issue with the idea of a Greek Dark Age and everything it implies for the understanding of Greek history culture and society They argue that the period is characterised as much by continuity as disruption and that the evidence from every source shows a progression from Mycenaean kingship to the conception of aristocratic nobility in the Archaic period The volume is divided into six parts dealing with political and social structures questions of continuity and transformation international and inter regional relations religion and hero cult Homeric epics and

heroic poetry and the archaeology of the Greek regions Copiously illustrated and with a collated bibliography itself a valuable resource this book is likely to be the essential and basic source of reference on the later phases of the Mycenaean and the Early Greek Iron Ages for many years **Achaïos** Evangelia Papadopoulou,Vassilis Chrysikopoulos,Gioulika Christakopoulou,2016-07-10 In Achaïos thirty five scholars from six different countries have contributed with thirty one papers as a small token of appreciation gratitude and affection to a true scholar who devoted his life studying and revealing the long journeys of the Mycenaeans and their culture **The Wider Island of Pelops** David Michael Smith,William G. Cavanagh,Angelos Papadopoulos,2023-03-23 This volume explores the myriad ways in which pottery was created utilized and experienced in the prehistoric Aegean across a period of more than 4000 years between the Middle Neolithic and the Early Iron Age transition **The Mycenaean Cemetery at Achaia Clauss near Patras** Constantinos Paschalidis,2018-11-30 Presents the study of the finds from the Mycenaean cemetery of Clauss near Patras carried out between 1988 1992 under the direction of Prof Thanassis Papadopoulos During the excavation project fifteen chamber tombs were located and researched in detail to be added to those already known from the pre war excavations by Nikolaos Kyparissis **Butrint 7** David Hernandez,Richard Hodges,2020-12-14 This volume brings together unpublished Italian and Albanian archaeological reports and new archaeological studies from recent fieldwork that throw new light on the archaeology and history of the Pavllas River Valley the Mediterranean alluvial plain in the territory of Butrint ancient Buthrotum in southwestern Albania It gives prominence for the first time to two important sites Kalivo and uka e Aitoit which are here reinterpreted and shown to have played major roles in the early history of Butrint as it evolved in the later first millennium BC to emerge as the key city of Chaonia in Epirus Butrint 7 also presents the full excavation report of the Late Bronze Age and Hellenistic fortified site of Mursi in addition to other Butrint Foundation surveys and excavations in the hinterland of Butrint including the Roman villa maritima at Diaporit the villa suburbana on the Vrina Plain and Roman sites on Alinura Bay and at the Customs House as well as new surveys of the early modern Triangular Fortress and a survey to locate the lost Venetian village of Zar pulo The volume also features a new study of the Hellenistic bronze statuette of Pan found on Mount Mile and of his sanctuary at Butrint The volume concludes with a comprehensive reassessment of the Pavllas River Valley in relation to Butrint from the Palaeolithic to the modern eras examining how dominion territory environment and the corrupting sea reshaped Butrint and its fluvial corridor diachronically and particularly brought profound territorial economic and social alterations under the Roman Empire
