

GENERATION ISOLATION: KEY FINDINGS

To empower and enable young people at scale we need to deeply understand the reality of their lives and respond to their needs.

To do this, we asked 5,000 young people aged 11-18 about their lives outside of school, their perception of the opportunities open to them and awareness of services designed to support them. These are the key findings:

73% of young people spend most of their free time on screens*.

19% spend most of their free time alone.

92% of young people do not attend a youth centre.

25% spend most of their free time playing computer games.

29% have had to stop out of school activities because of the rising cost of living.

81% of young people that attend a youth centre say it has a positive impact on their lives.

77% of young people spend most of their free time at home.

64% of young people report high or very high feelings of happiness.

31% of young people who say youth centres make a positive difference say it is because of making new friends.

1% of young people spend most of their free time hanging out on the streets.

56% of young people reported high or very high feelings of anxiety.

41% of young people do not have opportunities to meet new people and make friends.

*73% of young people surveyed spending most of their free time on screens (watching streamed content like Netflix/YouTube, gaming, spending time on their phone or watching TV)

The Isolation Generation:

The Isolation and Study of Nitrifying Bacteria William Merriott Gibbs, 1919 Changing Values, Persisting Cultures Thorleif Pettersson, Yilmaz R. Esmer, 2008 In 1981 the European and World Values surveys started the empirical investigation of cultural values on a global scale This volume builds upon the findings of these surveys and analyzes value change in a number of key countries around the globe The authors track value change and stability in their respective countries during the last decade the last two decades where data are available of the 20th century All authors have been actively involved in value surveys and have a great deal of expertise in countries that they write on Thus the volume is a valuable complement to studies that deal with the topic from a global perspective without providing any detail about individual societies The countries covered are Argentina Austria Canada Denmark France Germany Mexico the Netherlands South Africa South Korea Spain Sweden Turkey and the United States *Multiresonator-Based Chipless RFID* Stevan Preradovic, Nema Chandra Karmakar, 2012-01-07 This vital new resource offers engineers and researchers a window on important new technology that will supersede the barcode and is destined to change the face of logistics and product data handling In the last two decades radio frequency identification has grown fast with accelerated take up of RFID into the mainstream through its adoption by key users such as Wal Mart K Mart and the US Department of Defense RFID has many potential applications due to its flexibility capability to operate out of line of sight and its high data carrying capacity Yet despite optimistic projections of a market worth 25 billion by 2018 potential users are concerned about costs and investment returns Clearly demonstrating the need for a fully printable chipless RFID tag as well as a powerful and efficient reader to assimilate the tag's data this book moves on to describe both Introducing the general concepts in the field including technical data it then describes how a chipless RFID tag can be made using a planar disc loaded monopole antenna and an asymmetrical coupled spiral multi resonator The tag encodes data via the spectral signature technique and is now in its third generation version with an ultra wide band UWB reader operating at between 5 and 10.7GHz **ISCOMS - Book of Abstracts**, 2005

Principles of Gender-Specific Medicine Marianne Legato J, 2023-04-03 Awarded with the 2018 Prose Award in Clinical Medicine the third edition of *Principles of Gender Specific Medicine* explored and described exciting new areas in biomedicine that integrated technology into the treatment of disease and the augmentation of human function Novel topics such as the sex specific aspects of space medicine the development and the use of genderized robots and a discussion of cyborgs were included in the third edition providing a preview of the expanding world of sex specific physiology and therapeutics This Fourth Edition is a continuation of the mission to trace the relevance of biological sex to normal function and to the experience of disease in humans We are now twenty years into the postgenomic era The investigation of how the genome produces the phenotype has led to fascinating insights as well as yet unanswered questions *Principles of Gender Specific Medicine* Fourth Edition has a central theme discuss advances in understanding the role of epigenetics in regulating

gene expression in a dynamic sex specific way during human life It explores the protean role of epigenetics in human physiology the relevance of environmental experience to human function the therapeutic promise of cutting edge methodologies like gene manipulation the preparation of humans for space travel the use of artificial intelligence in detection and therapeutic decisions concerning disease states the possibilities for technological support of not only compromised individuals but of the augmentation of human function and an analysis of the benefits limitations and issues that surround our current expectations of personalized medicine Covers the most important developments in biomedical research in the past decade with a thoughtful analysis of how they impact patient care Discusses the feasibility and usefulness of personalized medicine the limits and promise of genetic editing the basis for variation in sexual identity and how artificial intelligence and technology will affect basic human function as well as correcting disability Promotes and facilitates discussions about the ethics and governance issues that surround much of what science is now able to do at the most basic levels of human s physiology

Cell Biology and Translational Medicine, Volume 12 Kursad Turksen,2021-07-20 Much research has focused on the basic cellular and molecular biological aspects of stem cells Much of this research has been fueled by their potential for use in regenerative medicine applications which has in turn spurred growing numbers of translational and clinical studies However more work is needed if the potential is to be realized for improvement of the lives and well being of patients with numerous diseases and conditions This book series Cell Biology and Translational Medicine CBTMED as part of Springer Nature s long standing and very successful Advances in Experimental Medicine and Biology book series has the goal to accelerate advances by timely information exchange Emerging areas of regenerative medicine and translational aspects of stem cells are covered in each volume Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas This current book is the twelfth volume of a continuing series

The Social Basis of Community Care (Routledge Revivals)

Martin Bulmer,2015-06-11 Care for the elderly disabled and mentally ill within and by the community forms a vital part of current social policy Martin Bulmer argues that this policy is inadequately thought out and rests on a series of poorly founded sociological assumptions As a result there is a vacuum at the heart of government s social care policy which is likely to lead to ineffective or deteriorating provision for those in need This book first published in 1987 will be essential reading for all those concerned with the organization and delivery of social care whether as students practitioners or teachers It will be particularly useful for courses dealing with social policy the personal social services and the social context of social work

Vitiligo Mauro Picardo,Alain Taïeb,2010-03-26 Vitiligo has been until recently a rather neglected area in dermatology and medicine Patients complain about this situation which has offered avenues to quacks and has led to the near orphan status of the disease The apparently simple and poorly symptomatic presentation of the disease has been a strong disadvantage to its study as compared to other common chronic skin disorders such as psoriasis and atopic dermatitis Vitiligo

is still considered by doctors as a non disease a simple aesthetic problem A good skin based angle of attack is also lacking because generalized vitiligo is clearly epitomizing the view of skin diseases as simple targets of a systemic unknown dysregulation diathesis reflecting the Hippocratic doctrine This view has mostly restricted vitiligo to the manifestation of an autoimmune diathesis in the past 30 years Thus skin events which are easily detected using skin biopsies in most other situations have not been precisely recorded with the argument that a clinical diagnosis was sufficient for the management or most commonly absence of management of the patient This book is an international effort to summarize the information gathered about this disorder at the clinical pathophysiological and therapeutic levels Its primary aim is to bridge current knowledge at the clinical and investigative level to point to the many unsolved issues and to delineate future priorities for research

Being Catholic in the Contemporary Philippines Jayeel Serrano Cornelio, 2016-06-23 This book based on extensive original research examines the nature of Catholicism in the contemporary Philippines It shows how Catholicism is apparently flourishing with good attendance at Sunday Masses impressive religious processions and flourishing charismatic groups and with interventions by the Catholic hierarchy in national and local politics However focusing in particular on the beliefs and practices of young people the book shows that young people are often adopting a different more individualised approach to Catholicism which is frequently out of step with the official position It considers the features of this a more personal and experiential relationship with God a new approach to morality in which right living is seen as more important than right believing and a critical view of what is seen as the Catholic hierarchy's misguidedness The book argues that this reinterpreting of religion by young people has the potential to alter fundamentally the nature of Catholicism in the Philippines but that nevertheless young people's new approach involves a solid enduring commitment and a strong view of their own Catholic religious identity

Microbial Diversity in the Genomic Era Surajit Das, Hirak Ranjan Dash, 2018-09-20 Microbial Diversity in the Genomic Era presents insights on the techniques used for microbial taxonomy and phylogeny along with their applications and respective pros and cons Though many advanced techniques for the identification of any unknown bacterium are available in the genomics era a far fewer number of the total microbial species have been discovered and identified to date The assessment of microbial taxonomy and biosystematics techniques discovered and practiced in the current genomics era with suitable recommendations is the prime focus of this book Discusses the techniques used for microbial taxonomy and phylogeny with their applications and respective pros and cons Reviews the evolving field of bacterial typing and the genomic technologies that enable comparative analysis of multiple genomes and the metagenomes of complex microbial environments Provides a uniform standard methodology for species designation

A Selected, Annotated Bibliography of Studies Relevant to the Isolation of Nuclear Wastes, 1980 *The Lived Experiences of Muslims in Europe* Des Delaney, 2019-09-19 This book unearths new knowledge and challenges existing paradigms in relation to the integration of minority communities It comprehensively reflects upon the complexity of

recognition experiences and integration challenges faced by Muslim individuals and groups in Europe By focusing on universal recognition themes related to experiences within personal relationships legal relations religion and civil society it makes an essential contribution to a deeper understanding of Muslim life in the West It offers a reconsideration of everyday lives of Muslims in Europe by drawing on the paradigm of recognition Exploring universal themes it demonstrates the complexity of recognitive relations by examining how Muslim individuals perceive the ways they are recognised or misrecognised within various spheres of everyday interaction It sheds light on the ways in which forms of recognition affect identity formation and social relations more generally and the broader ramifications that arise from such forms of misrecognition This book draws on Honneth s critical social theory of recognition to frame a range of grassroots interviews and focused discussion groups Grounded in qualitative research and with an emancipatory intent The Lived Experiences of Muslims in Europe challenges both the assumption that minority groups simply seek to have their particular culture and associated beliefs endorsed by a majority and the security paradigm that narrowly views Muslims in Europe through the lens of political extremism
