*A History of the World in 12 Maps* Jerry Brotton,2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated

and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph

Modernity at the Beginning of the 21st Century Volker Schmidt, 2008-12-11 Modernity is back on sociology's agenda From the beginnings of sociology as an academic discipline questions surrounding the meaning and consequences of modernity have fascinated generations of sociologists The initial interest in the concept was inspired by a sense of a deep rupture and crisis afflicting European society a sense that society was approaching something fundamentally different from the past an entirely new form of societal organization that bore little resemblance to anything known before Where exactly this transformation was headed was by no means clear but around the 18th century a growing number of European intellectuals and scholars realized that the changes that had been in the making since the late 15th century were irreversible and could not be contained in any particular region or confined to particular sectors of society but would ultimately transform all spheres of life Like other thinkers sociologists observed this transformation with awe and their attitude towards it has always been ambivalent The 20th century during which modernity gradually began to break through globally was also a century during which many sociologists became increasingly disillusioned with the promises of the modern project But with the exhaustion of the energies of postmodernism the intellectual movement that wanted to bury modernity the interest in modernity began to resurface again not least because it became increasingly clear that the world is far from approaching a societal condition pointing systematically beyond modernity Instead we are witnessing an intensification of modernization processes around the world But what is modernity anyway The aim of the present volume is to contribute to the ongoing discussion about the meaning of modernity and about the significance of modernization processes in non-Western societies As befits a subject matter as controversial and complex at this one the book's chapters offer no conclusive answers to the questions they raise and address The debate about modernity must and will continue and one hopes that it will be conducted in an atmosphere of mutual respect despite sometimes fierce disagreement between the participants For only if we listen to each other can we make genuine intellectual progress
