There is no papal document that has generated as much interest controversy and debate in recent times as Pope Francis's *Amoris Laetitia* This document which came out of two very divisive synods of Catholic bishops and leaders in Rome in 2014 and 2015 will probably be the most discussed document ever produced by a pope in modern Catholicism on marriage and family life This volume has gathered seminal commentaries on *Amoris Laetitia* by African Catholic theologians social scientists and pastoral workers They offer African theological and pastoral responses to the principles and practices proposed by Pope Francis and the Synod on the family on such contested issues as same sex relations divorce and remarriage and reception and denial of Holy Communion in the church among other divisive issues These important essays and commentaries show the strengths and weaknesses of this papal commentary and point out the missing link in the global conversation on marriage family and same sex relations Their argument for the inclusion of African perspectives and moral traditions in the search for a third way in finding an inclusive and integrated pastoral art of accompaniment is very compelling The authors here also call for the inclusion of Africa's own unique challenges like polygamy childless marriages and the impact of migration civil conflict diseases ecological and population crises and the rights of African women in the global discussion on marriage and family life They also challenge uncritical clichés in world Christianity that Africa's opposition to same sex marriages or Western propaganda about population or birth control and contraception are conservative while showing diverse African conversations on these topics in the search for abundant life on this beautiful continent

The A, B, C's of Parenting Janet Skinner, 2014-12-31 If you are a first time parent of a newborn infant you are just finding out that parenting is not just a job it's a full time round the clock profession for which there is no pay I find it

hard to believe that we actually get more training for the job of birthing the baby than we do for the profession of raising the child Almost all parents attend a course that lasts about eight weeks in order to learn about childbirth which takes an average of eight to fifteen hours from start to completion And you have a team of experts there with you throughout the entire process Then comes the day you take the little bundle home You are given a gift pack from the hospital and sent on your merry way to spend the next eighteen years guessing what to do next I believe this job is too important to leave up to chance For a child is a gift from God much more important than a gift to be placed on a shelf and forgotten all about Raising a child is an enormous responsibility and parents must take this responsibility seriously or face the consequences of not doing so Therefore I urge you to take the time to read this book I hope as you begin to walk down the path of parenting another human being the most important and incredible journey you will ever experience in life you will not forget the lessons learned from A to Z

Handbook of Parenting: Being and becoming a parent Marc H. Bornstein,2002 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny
