The Neuroses A Psychoanalytic Survey:

The Neuroses; a Psychoanalytic Survey [By] P. C. Kuiper Pieter Cornelis Kuiper, 1972 *The Neuroses (Neurosenleer, Engl.). A Psychoanalytic Survey* Pieter Cornelis Kuiper, 1972 The Neuroses Pieter Cornelis Kuiper, 1972 The Annual Survey of Psychoanalysis John Frosch, 1964 *A Psychoanalytic Study of Psychoses with Endocrinoses* Dudley Ward Fay, 1922 *The Psychoanalytic Review*, 1926 International Medical and Surgical Survey, 1922 **The Annual of Psychoanalysis, V. 26/27** Jerome A. Winer, 2013-06-17 Volume 26 27 begins with publication of The Annual's first prize essay Samuel Abrams's How Child and Adult Analysis Inform and Misinform One Another This is followed by a series of papers originally prepared for a symposium honoring John E Gedo These papers span the clinical topics of obsessiveness sublimation dreams and self analysis and analyzability and also delve into applied psychoanalysis and art history with two studies of Vincent van Gogh and another of Alberto Giacometti These papers not only convey the impressive range of Gedo's own interests but embody the high scholarly and clinical standards that Gedo has long held both for himself and for the field in general Section III offers original contributions to clinical analysis in the form of the consideration of the role of affective engagement in the analyst's usability thoughtful assessment of the perils of parental projection in child analytic work and comparison of a failed and successful supervision in the same psychoanalytic case Section IV examines psychoanalysis and the arts with two further studies of van Gogh an analytic reading of Nabokov's *Lolita* and more general examinations of psychoanalysis in relation to dramatic art and film analysis The volume closes with two provocative scholarly essays bearing on the roots of psychoanalysis the correspondence between Mabel Dodge and her analysts Smith Ely Jelliffe and A A Brill as a vehicle for reviewing the issue of extra and postanalytic contact between analyst and patient and an examination of Freud Lacan and the uneasy relationships among literature psychoanalysis and the female subject Volume 26 27 offers readers a rich harvest of contemporary insights about psychoanalysis including its history and evolution its continuing clinical refinement and its scholarly applications outside the consulting room *The Annual of Psychoanalysis, V. 21* Jerome A. Winer, 2013-05-13 Volume 21 of The Annual of Psychoanalysis is especially welcome for bringing to English language readers timely contributions from abroad in an opening section on Psychoanalysis in Europe The section begins with a translation of Helmut Thomae's substantial critique of the current state of psychoanalytic education Thomae's proposal for comprehensive reform revolves around a redefinition of the status of the training analysis in analytic training Diane L Heureux Le Beuf's clinical diary of an analysis focusing on the narcissistic elements of oedipal conflict probes the degree to which the analytic method can be applied to nonstructured analysands And Nella Guidi shows the clinical value of supplementing Freud's notion of unobjectionable positive transference with the complementary notion of unobjectionable negative transference Section II on Psychoanalysis and Hysteria offers original contributions to Freud scholarship in the form of Jules Glenn's reconsideration of Dora's Dynamics Diagnosis and Treatment William McGrath's analysis of the way Freud's hostility to religious superstition

gained expression in his early work on hysteria and Marian Tolpin's self psychological reprise on the case of Anne O. The section concludes with Elisabeth Young Bruehl and Sarah Cummin's provocative *What Happened to Anorexia Hysterique* which questions the contemporary separation of anorexia from hysteria and explore the sociohistorical reasons the separation came about. Section III Clinical and Theoretical Studies begins with Nancy Kobrin's discussion of Freud's ideas about autonomy including the terms Freud used and the way Strachey translated them into English. Her goal is to deepen our understanding of how Freud spoke and thought about an individual's sense of self. Frank Summers shows how object relations principles which are shared by various object relations theories can inform the conduct of analysis at all levels of pathology including neurosis. And Henry Smith examines the meaning and value of the analytic surface a metaphor that highlights the relationship between the analyst's attention and the patient's attention. A final section on Applied Psychoanalysis offers contemporary examples of applied analytic inquiry in anthropology art and literature. Roy Grinker III and Roy Grinker Jr in a methodological contribution to psychoanalytic anthropology examine what is revealed when a native people here the Lese of northeastern Zaire in Africa are asked to retell a story here the story of Cain and Abel introduced by them by their Western observers. Danielle Knafo explores the art and life of the Mexican surrealist Frida Kahlo through the concepts of the mirror the mask and the masquerade. And David Werman closes the volume with a comparative study of Edgar Allan Poe's and James Ensor's obsession with revenge and the role it played in Poe's writing and Ensor's etchings respectively. Bringing readers the influential reform proposals of Thomae a rich sampling of recent Freud scholarship applied contributions traversing three disciplines and original clinical contributions reflecting American and European sensibilities. Volume 21 of *The Annual* is true to the spirit of this distinguished series. It testifies to the scope of analytic inquiry and it exemplifies the yield of such inquiry in the hands of gifted scholars and clinicians.

The Technique and Practice of Psychoanalysis Ralph R. Greenson, 2018-05-08. This systematic and comprehensive volume written in a lively and clear style is devoted essentially to the fundamentals of psychoanalytic technique transference and resistance. The author approaches psychoanalytic technique from a classical theoretical framework but he frequently gives an entirely fresh view of traditionally accepted procedures. His most important new contribution consists in the clear distinction between the patient's real relationship to the analyst the working alliance and the transference relationship. His discussion of the contradictory and often conflicting demands which each of these elements makes on the technical skills of the analyst is particularly illuminating. In many fascinating case illustrations he shows how the analyst carries out therapeutic psychoanalysis while respecting the diversity of psychic constellations in different patients and at different points in their analyses. This book can be recommended without qualification to the beginning student because of the thorough clarification and documentation of the basic principles of psychoanalytic technique.

The psychoanalytic approach to religion has changed radically during the course of the twentieth century. In both clinical and theoretical work in psychoanalysis, developments have taken place that frequently are not noted by persons who assume that all that can be said has been said by Freud. The study of religious phenomena, persons, events, and traditions has always been a substantial part of applied psychoanalysis, and here also major developments have taken place. It is no exaggeration to state that the scientific study of religion has been revolutionized by the integration of psychological perspectives, including the field of psychoanalysis. This volume differs from other recent publications on the topic of psychoanalysis and religion in drawing upon the entire field of psychoanalytic involvement with religion. It is interdisciplinary in approach and unlike other books on the topic brings together an exceptional combination of theoretical, empirical, and clinical studies. No other book provides integrated examples of all three types of work.
