The Interpretation Of Pictures

Mark Rollins

The Interpretation Of Pictures:

The Interpretation of Pictures Mark W. Roskill, 1989 This volume examines the ways pictures are interpreted discussing the practices of interpretation that inform the modern discipline of art history in contrast to those that prevailed in earlier periods As an introductory text on the traditions and principles of interpretation the book explores key methods in a clear untechnical fashion and shows how the personalities and backgrounds of particular art historians have contributed to the character of their writings Based on case studies from the fifteenth century to the present the work begins with a discussion of the rhetoric of artwriting Chapter 1 defines art history as a profession in which interpretation is a basic act exploring the terms of discourse that follow from this premise and explaining how persuasiveness and sometimes consensus on the meaning of an art object are achieved Chapter 2 focuses on imagery and creative processes showing how interpretation can bridge the personal aspect of meaning with the communal and social aspects Chapter 3 looks at the relationship of interpretation to various institutions of art history especially museums Discussing the issue of indeterminacy the author questions whether there is any given or core identity to an art object apart from those attributed to it by particular interpreters

The Interpretation of Pictures Joy Schaverien, 2012-11-11 *The meaning of pictures, 6 lectures* John Charles Van Dyke, 1903 *Ancient Mythological Images and their Interpretation* Katharina Lorenz, 2016-08-18 This book offers a new theoretically informed framework for the interpretation of ancient visual culture How to Interpret Pictures... Franklin B. Sawvel, 1904 *The Interpretation of Dreams* Sigmund Freud, Abraham Arden Brill, 1915 *The Interpretation of Pictures and the Documentary Method* Ralf Bohnsack, 2010 Abstract Der Autor stellt die dokumentarische Methode der Bildinterpretation vor und bezieht sich dabei auf die Wissenssoziologie von Karl Mannheim in Verbindung mit ausgewählten Methoden und Theorien der Kunstgeschichte und der Semiotik Er begründet die Bildinterpretation als qualitative sozialwissenschaftliche Methode zunächst in theoretischer und methodologischer Hinsicht Die dokumentarische Methode ist demnach in ganz besonderer Weise in der Lage der Bildhaftigkeit ikonisiert von Medien gerecht zu werden und diese zugleich mit textbasierten Verfahren zu verbinden Aus methodischer Sicht geht es vor allem um die Rekonstruktion jenes Habitus der sich in Einzelbildern dokumentiert Der Autor unterscheidet zwischen einer formulierenden Interpretation Was die eine Beschreibung von Vorder Mittel und Hintergrund des Bildes auf der vor ikonografischen Ebene umfasst und einer reflektierenden Interpretation Wie die eine ikonologische Analyse der formalen Komposition des Bildes Library of Congress Subject Headings Library of Congress. Subject Headings Library of Congress, Library of Congress. Subject Cataloging Division, Library of Congress. Office for Subject Cataloging Policy, 1994 Readings in Artificial Intelligence Bonnie Lynn Webber, Nils J. Nilsson, 2014-05-12

Readings in Artificial Intelligence focuses on the principles, methodologies, advancements, and approaches involved in artificial intelligence. The selection first elaborates on representations of problems of reasoning about actions, a problem similarity approach to devising heuristics, and optimal search strategies for speech understanding control. Discussions focus on comparison with existing speech understanding systems, empirical comparisons of the different strategies, analysis of distance function approximation, problem similarity, problems of reasoning about action search for solution in the reduction system, and relationship between the initial search space and the higher level search space. The book then examines consistency in networks of relations, non-resolution theorem proving using rewriting rules for connection graphs to prove theorems, and closed world data bases. The manuscript tackles a truth maintenance system, elements of a plan-based theory of speech acts, and reasoning about knowledge and action. Topics include problems in reasoning about knowledge integration, knowledge and action models of plans, compositional adequacy, truth maintenance mechanisms, dialectical arguments and assumptions, and the problem of control. The selection is a valuable reference for researchers wanting to explore the field of artificial intelligence.

The Interpretation of Ultrastructure R. J. C. Harris, 2014-07-15

The Interpretation of Ultrastructure is a collection of papers dealing with techniques in ultrastructural research such as in fixation, reversed staining, ultrastructure in embryos, and in plants. Control of observations by light microscopy and cytochemistry at the electron microscope level. One paper describes various fixatives used on rat liver tissue, including a standard osmium tetroxide solution, pure melted osmium tetroxide, and strong osmium tetroxide solutions in carbon tetrachloride. Another paper points out that the use of electron micrographs of the cell nucleus and chromosomes should include approaches to chromosome analysis. For the investigator studying the three-dimensional organization of chromosomes, his approaches should include classical cytology and cytogenetics, chemical and cytochemical studies on nuclei, as well as chemical and physical analysis of nucleic acid and nucleoprotein molecules. Several papers discuss the study of natural and artificial DNA plasma by thin sections, an assessment of negative staining techniques for revealing ultrastructure, and other approaches in the study of biological ultrastructure by high-resolution electron microscopy. The collection will benefit microbiologists, biotechnologists, and academicians connected with the biological sciences.

Group-Theoretical Methods in Image Understanding Ken-ichi Kanatani, 2012-12-06

Image understanding is an attempt to extract knowledge about a 3D scene from 2D images. The recent development of computers has made it possible to automate a wide range of systems and operations, not only in the industry, military, and special environments, space, sea, atomic plants, etc., but also in daily life. As we now try to build ever more intelligent systems, the need for visual control has been strongly recognized, and the interest in image understanding has grown rapidly. Already, there exists a vast body of literature ranging from general philosophical discourses to processing

techniques Compared with other works however this book may be unique in that its central focus is on mathematical principles Lie groups and group representation theory in particular In the study of the relationship between the 3D scene and the 2D image geometry naturally plays a central role Today so many branches are interwoven in geometry that we cannot truly regard it as a single subject Nevertheless as Felix Klein declared in his Erlangen Program the central principle of geometry is group theory because geometrical concepts are abstractions of properties that are invariant with respect to some group of transformations In this text we specifically focus on two groups of transformations One is 2D rotations of the image coordinate system around the image origin Such coordinate rotations are indeed irrelevant when we look for intrinsic image properties
