is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition *The Mechanics of Wonder* will arouse debate and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read

The Time Machines Mike Ashley, 2000-12-01 Originally conceived as a trilogy this is the first of five volumes that chart the history of the science fiction magazine from the earliest days to the present This first volume looks at the exuberant years of the pulp magazines It traces the growth and development of the science fiction magazines from when Hugo Gernsback launched the very first *Amazing Stories* in 1926 through to the birth of the atomic age and the death of the pulps in the early 1950s These were the days of the youth of science fiction when it was brash raw and exciting the days of the first great space operas by Edward Elmer Smith and Edmond Hamilton through the cosmic thought variants by Murray Leinster Jack Williamson and others to the early 1940s when John W Campbell at *Astounding* did his best to nurture the infant genre into adulthood Under him such major names as Robert A Heinlein Isaac Asimov A E van Vogt and Theodore Sturgeon emerged who along with other such new talents as Ray Bradbury and Arthur C Clarke helped create modern science fiction For over forty years magazines were at the heart of science fiction and this book considers how the magazines and their publishers editors and authors influenced the growth and perception of this fascinating genre

Gateways to Forever Mike Ashley, 2007-04-01 This third

volume in Mike Ashley's four volume study of the science fiction magazines focuses on the turbulent years of the 1970s when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science fiction magazines. Not only were they struggling to survive within the economic climate they also had to cope with the death of the father of modern science fiction John W Campbell Jr while facing new and potentially threatening opposition. The market for science fiction diversified as never before with the growth in new anthologies the emergence of semi professional magazines the explosion of science fiction in college the start of role playing gaming magazines underground and adult comics and with the success of Star Wars media magazines. This volume explores how the traditional science fiction magazines coped with this from the death of Campbell to the start of the major popular science magazine Omni and the first dreams of the Internet.

Benchmarks Revisited 1983-1986 Algis Budrys, 2013-05-24 Consists of book reviews and essays written for The magazine of fantasy and science fiction. *Transformations* Mike Ashley, 2005-02-01 This is the second of three volumes which chart the history of the science fiction magazine from the earliest days to the present. The first volume Time Machines traced the development of the sf magazine from its earliest days and the creation of the first specialist magazine Amazing Stories. Transformations takes up the story to reveal a turbulent period that was to witness the extraordinary rise and fall and rise again of science Britain's foremost sf historian Mike Ashley charts the sf boom years in the wake of the nuclear age that was to see the The Golden Age of Science Fiction with the emergence of magazines such as Galaxy Startling Stories and Fantastic as well as authors like Isaac Asimov Philip K Dick and Frank Herbert. He then goes on to explore the bust years of 1954-1960 followed by the renaissance in the 1960s led by the new wave of British authors like Michael Moorcock and J G Ballard and the rise in interest of fantasy fiction encouraged by Lord of the Rings and the Conan books of Robert E Howard. Transformations concludes with an examination of the new found interest in sf magazines during the late 1960s and the incredibly influential roles Star Trek the film 2001 A Space Odyssey and above all the first manned Moon landing played in transforming the sf magazine.

Uncovering Lives Alan C. Elms, 1997-05-01 Psychobiography is often attacked by critics who feel that it trivializes complex adult personalities explaining the large deeds of great individuals as George Will wrote by some slight the individual suffered at a tender age say 7 when his mother took away a lollipop Worse yet some writers have clearly abused psychobiography for instance to grind axes from the right Nancy Clinch on the Kennedy family or from the left Fawn Brodie on Richard Nixon and others have offered woefully inept diagnoses such as Albert Goldman's portrait of Elvis Presley as a split personality and a delusional paranoid And yet as Alan Elms argues in *Uncovering Lives* in the hands of a skilled practitioner psychobiography can rival the very best traditional biography in the insights it offers Elms makes a strong case for the value of psychobiography arguing in large part from example Indeed most of the book features Elms's own fascinating case studies of over a dozen prominent figures among them Sigmund Freud the father of psychobiography B F Skinner Isaac Asimov L Frank Baum Vladimir Nabokov Jimmy Carter George Bush Saddam Hussein and Henry Kissinger These profiles make intriguing reading For example Elms discusses the fiction of Isaac Asimov in light of the latter's acrophobia fear of heights and mild agoraphobia fear of open spaces and Elms includes excerpts from a series of letters between himself and Asimov He reveals an unintended subtext of *The Wizard of Oz* that males are weak females are strong think of Scarecrow Tin Man the Lion and the Wizard versus the good and bad witches and Dorothy herself and traces this in part to Baum's childhood heart disease which kept him from strenuous activity and to his relationship with his mother in law Matilda Joslyn Gage a distinguished advocate of women's rights And in a fascinating chapter he examines the abused childhood of Saddam Hussein the privileged childhood of George Bush and the radically different psychological paths that led these two men into the Persian Gulf War Elms supports each study with extensive research much of it never presented before for instance on how some of the most revealing portions of C G Jung's autobiography were deleted in spite of his protests before publication Along the way Elms provides much insight into how psychobiography is written Finally he proposes clear guidelines for judging high quality work and offers practical tips for anyone interested in writing in this genre Written with great clarity and wit *Uncovering Lives* illuminates the contributions that psychology can make to biography

Elms's enthusiasm for his subject is contagious and will inspire would-be psychobiographers as well as win over the most hardened skeptics **Teaching the Short Story** A.
