The Jordan Valley Life And Society Below Sea Level

**Laura Etheredge Assistant Editor,
Middle East Geography**

The Jordan Valley Life And Society Below Sea Level:

The Jordan Valley, 1981 **Life on the Watershed** Eva Kaptijn, 2009 The scarcity of water is a major problem in many parts of the Near East today and has been so in the past To survive in such a region people should be able to structurally attain more water than rainfall alone can supply The archaeology of this area should not only identify when people inhabited such a region and what the character of this habitation was but also how people were able to survive in such a region and why they chose to live there in the first place In this book these questions have been studied for the Zerqa Triangle a region in the middle Jordan Valley around Tell Deir Alla Jordan By means of a detailed pedestrian archaeological survey the intensity of habitation of the region from the Neolithic to early modern periods is investigated Efforts have been undertaken to reconstruct the agricultural practices in the various periods and simultaneously the means by which the different communities were able to practice agriculture in other words how did they irrigate the land By focussing on the different social responses of communities conclusions have been drawn on how and why people managed to create a living in this arid but potentially very fertile region This book not only contributes to the ongoing discussion of the archaeology of marginal areas but also provides a huge amount of new data on the archaeology of the Jordan Valley both in the form of newly discovered settlement sites from several different periods as well as remains from several more inconspicuous types of human activity present in the countryside Water, Life and Civilisation Steven Mithen, Emily Black, 2011-04-21 A unique interdisciplinary study of the relationships between climate hydrology and human society from 20 000 years ago to the present day within the Jordan Valley It describes how state of the art models can simulate the past present and future climates of the Near East reviews and provides new evidence for environmental change from geological deposits builds hydrological models for the River Jordan and associated wadis and explains how present day urban and rural communities manage their water supply The volume provides a new approach and new methods that can be applied for exploring the relationships between climate hydrology and human society in arid and semi arid regions throughout the world It is an invaluable reference for researchers and advanced students concerned with the impacts of climate change and hydrology on human society especially in the Near East **The History of Water in the Land Once Called Palestine** Christopher Ward, Sandra Ruckstuhl, Isabelle Learmont, 2021-11-04 Shared water resources in Israel and Palestine are often the site of political economic historical legal and ethical contestation In this the first of two volumes on the subject the authors look beyond the political tensions of the region to argue for the need for shared water security and co operative resource management The History of Water in the Land Once Called Palestine traces the history of water resources and security and their development from the Ottoman period until 2020 examining how the state of water security amongst Palestinians and Israelis has diverged resulting in the current success of Israeli water security in contrast to the high water insecurity experienced by Palestinians The authors assess water security in three parts security of access to water resources security of

access to water services and finally security against risks to and from water *Tell es-Sultan/Jericho in the Context of the Jordan Valley: Site Management, Conservation and Sustainable Development* Lorenzo Nigro, 2006 *Home and Homeland* Linda L. Layne, 2019-01-15 In this provocative examination of collective identity in Jordan Linda Layne challenges long held Western assumptions that Arabs belong to easily recognizable corporate social groups Who is a true Jordanian Who is a true Bedouin These questions according to Layne are examples of a kind of pigeonholing that has distorted the reality of Jordanian national politics In developing an alternate approach she shows that the fluid social identities of Jordan emerge from an ongoing dialogue among tribespeople members of the intelligentsia Hashemite rulers and Western social scientists Many commentators on social identity in the Middle East limit their studies to the village level but Layne s goal is to discover how the identity building processes of the locality and of the nation condition each other She finds that the tribes creates their own cultural homes through a dialogue with official nationalist rhetoric and Jordanian urbanites while King Hussein in turn maintains the idea of the homeland in many ways that are powerfully influenced by the tribespeople The identities so formed resemble the shifting irregular shapes of postmodernist landscapes but Hussein and the Jordanian people are also beginning to use a classically modernist linear narrative to describe themselves Layne maintains however that even with this change Jordanian identities will remain resistant to all or nothing descriptions Linda L Layne is Alma and H Erwin Hale Teaching Professor of Humanities and Social Sciences in the Department of Science and Technology Studies at Rensselaer Polytechnic Institute Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Routledge Handbook of Water and Development* Sofie Hellberg, Fredrik Söderbaum, Ashok Swain, Joakim Öjendal, 2023-11-21 Water is essential for human life and at the centre of political economic and socio cultural development This Routledge Handbook of Water and Development offers a systematic wide ranging and state of the art guide to the diverse links between water and development across the globe It is organized into four parts Part I explores the most significant theories and approaches to the relationship between water and development Part II consists of carefully selected in depth case studies revealing how water utilization and management are deeply intertwined with historical development paths and economic and socio cultural structures Part III analyses the role of governance in the management of water and development Part IV covers the most urgent themes and issues pertaining to water and development in the contemporary world ranging from climate change and water stress to agriculture and migration The 32 chapters by leading experts are meant to stimulate researchers and students in a wide range of disciplines in the social and natural sciences including Geography Environmental Studies Development Studies and

Political Science The Handbook will also be of great value to policymakers and practitioners *The Dead Sea and the Jordan River* Barbara Kreiger, 2016-03-21 For centuries travelers have been drawn to the stunning and mysterious Dead Sea and Jordan River a region which is unlike any other on earth in its religious and historical significance In this exceptionally engaging and readable book Barbara Kreiger chronicles the natural and human history of these storied bodies of water drawing on accounts by travelers pilgrims and explorers from ancient times to the present She conveys the blend of spiritual touristic and scientific motivations that have driven exploration and describes the modern exploitation of the lake and the surrounding area through mineral extraction and agriculture Today both lake and river are in crisis and stewardship of these water resources is bound up with political conflicts in the region The Dead Sea and the Jordan River combines history literature travelogue and natural history in a way that makes it hard to put down **Enhancing water management capacity in a changing world: the challenge of increasing global access to water and sanitation** Fernando Rosado Spilki (organizador), Marcos Cortesão Barnsley Scheuenstuhl (organizador), José Gazilia Tundisi (organizador), **Rivers of Fire** Arnon Sofer, 1999 In a never ending battle to match population growth with food and energy production the countries of the Middle East have been frenziedly developing water resources including international rivers and groundwater without considering their neighbors needs The inevitable result has been more frequent and increasingly bitter conflicts At the same time a halting Arab Israeli peace process spurred by the collapse of the Soviet Union continues Are we indeed entering a new era in a new Middle East Do the region s leaders understand that reality has changed and that a transition is inevitable Focusing on international rivers and ground water in the region this timely study provides thoughtful_if pessimistic_answers to these questions Encompassing all water sources in the Middle East Arnon Soffer thoroughly explores the Nile Tigris Euphrates Jordan Orontes and Litani Rivers as well as international groundwater He also weighs the implications of going to war over water and such unconventional solutions to the water shortage as desalination and importation *The Legacy of Tethys* F.D. Por, 2012-12-06 This book is an attempt to present a comprehensive view on the aquatic biogeography of a small but very dynamic and complex area of the globe Luckily this area called here the Levant has attracted much interest in the past and is being increasingly studied in the present The interphasing between the knowledge of the historical and formative processes and that of the recent distributional aspects is fairly good The recent years saw also a widening effort which expressed itself in several symposia and monographic books Therefore I considered it possible to treat the whole subject of the aquatic biogeography of the Levant singlehandedly rather than in the presently widespread manner of an edited book I am keenly conscious of the shortcomings of my approach of presenting much second hand information Possibly this is being compensated by the fact that this book has a more coherent structure and eventually a clearer scientific message The effort spent in synthesizing the data from the widely different sources hopefully pays off in a presentation which is more easily comprehended by the average reader For the suspicious reader I would recommend to read first the closing chapter of this

book in which the quintessence of this book and its message is presented in a summarizing manner **Water and Power**

Miriam R. Lowi, 1995-10-26 Why do states in arid regions fail to cooperate in sharing water resources when cooperation would appear to be in their mutual interest Through in depth analysis of the history and current status of the dispute over the Jordan River basin Miriam Lowi explores the answers to these critical questions *Water and Peace in the Middle East* J. Isaac, H. Shuval, 1994-04-05 The volume serves as an important milestone in the process called second track dialogue and cooperation between Israeli and Palestinian academics on crucial shared problems the resolution of which is vital to the peace process The book contains forty one original papers dealing with almost all aspects of the Middle Eastern water problems and should serve as a useful reference to students scholars and policy makers all over the world interested in understanding the complexities of the Middle Eastern water conflicts **Irrigation Water Pricing** François Molle, Jeremy Berkoff, 2007 This book contains 14 separately authored chapters on the pricing of irrigation water The chapters are entitled

- 1 Water pricing in irrigation the lifetime of an idea
- 2 Water pricing in irrigation mapping the debate in the light of experience
- 3 Why is agricultural water demand unresponsive at low price ranges
- 4 Get the prices right a model of water prices and irrigation efficiency in Maharashtra India
- 5 Thailand's free water rationale for a water charge and policy shifts
- 6 Water rights and water fees in rural Tanzania
- 7 Who will pay for water The Vietnamese State's dilemma of decentralization of water management in the Red River Delta
- 8 Water pricing in Haryana India
- 9 The energy irrigation nexus in South Asia
- 10 groundwater conservation and power sector viability
- 11 Wells and canals in Jordan can pricing policies regulate irrigation water use
- 12 Water pricing in Tadla Morocco
- 13 Water pricing policies and recent reforms in China the conflict between conservation and other policy goals
- 14 Water pricing and irrigation a review of the European experience and

Policy driven determinants of irrigation development and environmental sustainability a case study in Spain **Cooperating Rivals**

Jeffrey K. Sosland, 2012-02-01 This book examines the politics of water scarcity in the Middle East's Jordan River Basin Syria Lebanon Jordan Israel and the Palestinian Authority between 1920 and 2006 Jeffrey K Sosland demonstrates that while water scarcity might generate political tension it does not by itself precipitate war nor is it likely to do so At the same time efforts to promote water cooperation such as those initiated by the United States have an identifiable political benefit by creating rules building confidence and reducing tensions among adversaries Sosland concludes that while this alone might not resolve the overall conflict it does create positive long term value in achieving peace **Administration and Development in the Arab World** Jamil Jreisat, Zaki R. Ghosheh, 2016-03-22 This book first published in 1986 examines the literature on administration human resources and development in the Arab world It emphasizes contemporary societies and their internal dynamics the least known and most critical aspects of Arabic studies *Water Resources and Conflict in the Middle East*

Nurit Kliot, 2005-07-28 Offers a complete reference to the hydrological as well as social economic political and legal issues in the region It shows how water shortages threaten the renewal of conflict and disruption in the Euphrates Tigris Nile and

Jordan basins **Out of the Earth** Daniel Hillel,1992-09-30 A moving tribute to the physical and spiritual properties of nature s richest element by one of the world s leading soil conservationists **Syria, Lebanon, and Jordan** Laura Etheredge Assistant Editor, Middle East Geography,2011-01-15 Presents histories of Syria Lebanon and Jordan and the geographic economic and social factors that have come to define them **A History of Jordan** Philip Robins,2004-02-09
