Advanced Science and Technology of Sintering Biljana D. Stojanovic, Valery V. Skorokhod, Maria Vesna Nikolic, 2011-06-28 This volume entitled Advanced Science and Technology of Sintering contains the edited Proceedings of the Ninth World Round Table Conference on Sintering IX WRTCS held in Belgrade Yugoslavia September 1-4 1998. The gathering was one in a series of World Round Table Conferences on Sintering organised every four years by the Serbian Academy of Sciences and Arts SASA and the International Institute for the Science of Sintering IISS. The World Round Table Conferences on Sintering have been traditionally held in Yugoslavia. The first meeting was organised in Herceg Novi in 1969 and since then they have regularly gathered the scientific elite in the science of sintering. It is not by chance that at these conferences G. C. Kuczynski, G. V. Samsonov, R. Coble, Ya. E. Geguzin and other great names in this branch of science presented their latest results making great qualitative leaps in the its development. Belgrade hosted this conference for the first time. It was chosen as a reminder that 30 years ago it was the place where the International Team for Sintering was formed further growing into the International Institute for the Science of Sintering. The IX WRTCS lasted four days. It included 156 participants from 17 countries who presented the results of their theoretical and experimental research in 130 papers in the form of plenary lectures, oral presentations and poster sections.

Science of Sintering H. Palmour III, R.M. Spriggs, D.P. Uskokovic, 2013-11-11 This volume SCIENCE OF SINTERING NEW DIRECTIONS FOR MATERIALS PROCESSING AND MICROSTRUCTURAL CONTROL contains the edited Proceedings of the Seventh World Round Table Conference on Sintering held in Herceg Novi Yugoslavia Aug 28-Sept 1 1989. It was organized by the International Institute for the Science of Sintering IISS headquartered in Belgrade Yugoslavia. Every fourth year since 1969 the Institute has organized such a Round Table Conference on Sintering each has taken place at some selected location within Yugoslavia. A separate series of IISS Topical Sintering Symposia Summer Schools have also been held at four year intervals but they have been offset by about two years so they occur between the main Conferences. As a rule the Topical

Sintering Symposia have been devoted to more specific topics and they also take place in different countries. The aim of these Conferences and their related Summer Schools has been to bring together scientists from all over the world who work in various fields of science and technology concerned with sintering and sintered materials. A total of seven IISS Conferences have been held over the period 1969-1989 and they have been supplemented by the four Topical Sintering Symposia held in Yugoslavia, Poland, India, and Japan in 1975, 1979, 1983, and 1987 respectively. This most recent five day Conference addressed the fundamental scientific background as well as the technological state of the art pertinent to science of sintering and high technology sintered materials. **Scientific Monograph** United States. Agglomeration in Industry, 2 Volume Set Wolfgang B. Pietsch, 2004-12-27. An up to date overview dealing with the occurrence and key applications of agglomeration including unwanted adhesion and beneficial size enlargement in pharmaceutical, food, and animal feed, chemical fertilizer, and agrochemical, mineral building material, and ceramic metal solid fuel, as well as other industries. Furthermore, the book emphasizes recent developments at the level of single particles and applications of agglomeration phenomena in nanotechnology. The author has a vast academic and industrial experience as researcher, teacher, developer, designer, vendor, and user. He is an expert and consultant in the field of agglomeration, its technologies, and products. This background makes the detailed evaluation of the subject possible. Wolfgang Pietsch has held a number of leading positions in both US and German companies and is a frequent speaker at conferences and seminars. He has already written three earlier books on agglomeration. Intended for everybody working in companies that process and handle particulate solids, this book helps in understanding and controlling unwanted agglomeration as well as promoting the application, development, and improvement of methods for the beneficial use of agglomeration. **Selective Laser Sintering**

Additive Manufacturing Technology Chunze Yan, Yusheng Shi, Li Zhaoqing, Shifeng Wen, Qingsong Wei, 2020-11-20

Selective Laser Sintering Additive Manufacturing Technology is a unique and comprehensive guide to this emerging technology. It covers in detail the equipment, software, algorithms, and control systems, material preparations, and process technology, precision control, simulation, analysis, and provides examples of applications of selective laser sintering (SLS). SLS technology is one of the most promising advances in 3D printing due to the high complexity of parts it can form, short manufacturing cycle, low cost, and wide range of materials. It is compatible with typical examples of SLS technology include SLS manufacturing, casting molds, sand molds, core injection molds with conformal cooling channels, and rapid prototyping of ceramic and plastic functional parts. It is already widely used in aviation, aerospace, medical treatment, machinery, and numerous other industries. Drawing on world leading research, the authors provide state of the art descriptions of the technologies, tools, and techniques which are helping academics and engineers use SLS ever more effectively and widely. Provides instructions for how to accurately use SLS for forming. Analyses the numerical simulation methods for key SLS technologies. Addresses the use of SLS for a range of materials including polymer, ceramic, and coated sand powder.
