Wet-pavement Safety Programs

S. H. Dahir,1990 This synthesis will be

of interest to pavement engineers safety officers and others interested in wet pavement safety programs Information is

provided on the programs used by a number of agencies in gathering data and correcting areas of potential wet weather

accidents Wet pavement accidents continue to be of concern to highway agencies This report of the Transportation Research

Board summarizes agencies programs in areas such as accident reporting vehicle testing friction testing corrective actions

for problem areas and tort liability and gives some general guidelines for the content of a wet pavement safety program

*Evaluation of Pavement Friction Characteristics* John Jewett Henry,2000 This synthesis report will be of interest to

pavement design construction management and research engineers highway safety officials and others concerned with

pavement friction characteristics It describes the current state of the practice and discusses the methods used for evaluating

wet pavement friction characteristics of new and restored pavements This synthesis reviews models used for measuring and

evaluating friction and texture causes for friction changes over time and aggregate and mix design to provide adequate

friction Also presented are construction and surface restoration practices for providing good pavement surface

characteristics In addition considerations of noise and ride quality are discussed when compromise may be required
