21st Century Kaiju Gordon Arnold, 2023-11-30 Once dismissed as a fading genre with little to say to contemporary audiences the giant monster movie roared back to life in the new millennium In one of modern cinema's most surprising turnarounds a wave of 21st century kaiju films has delivered exciting and thought provoking viewing to global audiences In a variety of works that range from action packed CGI spectacles to more personal introspective productions commenting on real world issues of the day the new millennium has witnessed some of the most intriguing films in any genre including movies from such acclaimed directors such as Guillermo del Toro Bong Joon ho and Peter Jackson This book takes a sober multidimensional look at the new class of giant monster movies It examines the making of these films and their sometimes obscure meanings It also covers efforts to reinvent storied kaiju characters from the past including Godzilla and King Kong and to transform the genre with movies such as Cloverfield The Mist Colossal and Pacific Rim that feature all new creatures

The Aesthetics of Island Space Johannes Riquet, 2019-12-18 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works The Aesthetics of Island Space discusses islands as central figures in the modern experience of space It examines the spatial poetics of islands in literary texts from Shakespeare's The Tempest to Ghosh's The Hungry Tide in the journals of explorers and scientists such as James Cook and Charles Darwin and in Hollywood cinema It traces the ways in which literary and cinematic islands have functioned as malleable spatial figures that offer vivid perceptual experiences as well as a geopoetic oscillation between the material energies of words and images and the energies of the physical world The chapters focus on America's island gateways Roanoke and Ellis Island visions of tropical islands Tahiti and imagined South Sea islands the islands of the US Canadian border region in the Pacific Northwest

and the imaginative appeal of mutable islands It argues that modern voyages of discovery posed considerable perceptual and cognitive challenges to the experience of space and that these challenges were negotiated in complex and contradictory ways via poetic engagement with islands Discussions of island narratives in postcolonial theory have broadened understanding of how islands have been imagined as geometrical abstractions bounded spaces easily subjected to the colonial gaze There is however a second story of islands in the Western imagination which runs parallel to this colonial story In this alternative account the modern experience of islands in the age of discovery went hand in hand with a disintegration of received models of understanding global space Drawing on and rethinking post phenomenological geocritical and geopoetic theories The Aesthetics of Island Space argues that the modern experience of islands as mobile and shifting territories implied a dispersal fragmentation and diversification of spatial experience and it explores how this disruption is registered and negotiated by both non fictional and fictional responses

Prehistoric Monsters Allen A.
