Database Systems for Advanced Applications Hiroyuki Kitagawa, Yoshiharu Ishikawa, Wenjie Li, Chiemi Watanabe, 2010-03-18 This two volume set LNCS 5981 and LNCS 5982 constitutes the refereed proceedings of the 15th International Conference on Database Systems for Advanced Applications DASFAA 2010 held in Tsukuba Japan in April 2010. The 39 revised full papers and 16 revised short papers presented together with 3 invited keynote papers, 22 demonstration papers, 6 industrial papers and 2 keynote talks were carefully reviewed and selected from 285 submissions. The papers of the first volume are organized in topical sections on P2P based technologies, data mining technologies, XML search and matching, graphs, spatial databases, XML technologies, time series and streams, advanced data mining, query processing, Web sensor networks and communications, information management as well as communities and Web graphs. The second volume contains contributions related to trajectories and moving objects, skyline queries, privacy and security, data streams, similarity search and event processing, storage and advanced topics, industrial demo papers and tutorials and panels. *Intelligent Interactive Multimedia Systems and Services 2016* Giuseppe De Pietro, Luigi Gallo, Robert J. Howlett, Lakhmi C. Jain, 2016-06-03 This book contains the contributions presented at the ninth international KES conference on Intelligent Interactive Multimedia Systems and Services which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains 65 peer-reviewed book chapters that focus on issues ranging from intelligent image or video storage, retrieval, transmission and analysis to knowledge-based technologies, from advanced information technology architectures for video processing and transmission to advanced functionalities of information and knowledge-based services. We believe that this book will serve as a useful source of knowledge for both academia and industry for all those faculty members, research scientists, scholars, Ph.D. students and practitioners who are interested in fundamental and applied facets of intelligent interactive multimedia. Information and Communication Technology for Intelligent Systems (ICTIS 2017) - Volume 1 Suresh Chandra Satapathy, Amit Joshi, 2017-08-07 This volume includes 74 papers presented at ICTIS 2017, Second International Conference on Information and Communication Technology for Intelligent Systems. The conference was held on 25th and 26th March 2017 in Ahmedabad, India, and organized jointly by the Associated Chambers of Commerce and Industry of India (ASSOCHAM) Gujarat Chapter, the G. R. Foundation, the Association of Computer Machinery, Ahmedabad Chapter, and supported by the Computer Society of India, Division IV (Communication) and Division V (Education and Research). The papers featured mainly focus on information and communications technology (ICT) for computation, algorithms and data analytics. The fundamentals of various data analytics and algorithms discussed are useful to researchers in the field. *Service Computing: Concept, Method and Technology* Zhaohui Wu, 2014-12-06 Service computing is a cross-disciplinary field that covers science and technology and represents a promising direction for distributed computing and software development methodologies. It aims to bridge the gap between business services and IT services by supporting the whole lifecycle of services innovation. Over the last ten years

applications in industry and academic research have produced considerable progress and success Service Computing Concept Method and Technology presents the concept of service computing and a proposed reference architecture for service computing research before proceeding to introduce two underlying technologies Web services and service oriented architecture It also presents the authors latest research findings on hot topics such as service discovery recommendation composition verification service trust dynamic configuration and big data service Some new models and methods are proposed including three service discovery methods based on semantics and skyline technologies two service recommendation methods using graph mining and QoS prediction two service composition methods with graph planning and one service verification method using p calculus and so on Moreover this book introduces JTang an underlying platform supporting service computing which is a product of the authors last ten years of research and development Systematically reviews all the research on service computing Introduces state of art research works on service computing and provides a road map for future directions Bridges the gap between service computing theory and practice Provides guidance for both industry and academia

Skylines and Other Dominance-Based Queries Apostolos N. Papadopoulos, Eleftherios Tiakas, Theodoros Tzouramanis, Nikolaos Georgiadis, Yannis Manolopoulos, 2022-06-01 This book is a gentle introduction to dominance based query processing techniques and their applications The book aims to present fundamental as well as some advanced issues in the area in a precise but easy to follow manner Dominance is an intuitive concept that can be used in many different ways in diverse application domains The concept of dominance is based on the values of the attributes of each object An object dominates another object if it is better than This goodness criterion may differ from one user to another However all decisions boil down to the minimization or maximization of attribute values In this book we will explore algorithms and applications related to dominance based query processing The concept of dominance has a long history in finance and multi criteria optimization However the introduction of the concept to the database community in 2001 inspired many researchers to contribute to the area Therefore many algorithmic techniques have been proposed for the efficient processing of dominance based queries such as skyline queries dominant queries and top dominating queries just to name a few

Database Systems for Advanced Applications Sourav S. Bhowmick, Curtis Dyreson, Christian S. Jensen, Mong Li Lee, Agus Muliantara, Bernhard Thalheim, 2014-04-16 These two volumes set LNCS 8421 and LNCS 8422 constitutes the refereed proceedings of the 19th International Conference on Database Systems for Advanced Applications DASFAA 2014 held in Bali Indonesia in April 2014 The 62 revised full papers presented together with 1 extended abstract paper 4 industrial papers 6 demo presentations 3 tutorials and 1 panel paper were carefully reviewed and selected from a total of 257 submissions The papers cover the following topics big data management indexing and query processing graph data management spatio temporal data management database for emerging hardware data mining probabilistic and uncertain data management web and social data management security privacy and trust keyword search data stream management and data quality

Transactions on Large-Scale Data- and Knowledge-Centered Systems VI Abdelkader Hameurlain, Josef Küng, Roland Wagner, Stephen W. Liddle, Klaus-Dieter Schewe, Xiaofang Zhou, 2012-09-22 The LNCS journal Transactions on Large Scale Data and Knowledge Centered Systems focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science Since the 1990s the Internet has become the main driving force behind application development in all domains An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability Current decentralized systems still focus on data and knowledge as their main resource Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent systems with scaling and decentralized control Synergy between grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments This the sixth issue of Transactions on Large Scale Data and Knowledge Centered Systems contains eight extended and revised versions of papers selected from those presented at DEXA 2011 Topics covered include skyline queries probabilistic logics and reasoning theory of conceptual modeling prediction in networks of moving objects validation of XML integrity constraints management of

loosely structured multi dimensional data data discovery in the presence of annotations and quality ranking for Web articles
