beyond the traditional dichotomies **Welfare State Transformation in the Yugoslav Successor States** Marija
Stambolieva,2016-04-28 Welfare states are the product of economic political and social interactions and undergo changes as
these interactions transform Existing welfare state theories mainly tend to explain the emergence and development of the
welfare state in the western industrialized and capitalist world While the states of Central and Eastern Europe have recently
been integrated in the academic discourse the countries of the former Yugoslavia have been predominantly excluded from
comparative analysis Issues of nationalism and ethnic polarization have been prevalent there while socio economic issues
have been put on the back burner This book explores what happened to the strong social states and relatively equal societies
which existed in Slovenia Croatia Serbia and Macedonia and looks into what accounts for these diverse outcomes By
investigating the applicability of the theories on welfare state development and typologization it fills in the gap in the welfare
state literature It offers an original typology of social citizenship that takes into account the diversity of welfare policy
formations across the region The aim of this typology is not to compete with existing ones but rather to offer a framework for
better understanding of states that do not necessarily fit into known explanatory categories In a global context of changing
economic circumstances and contending political responses macroeconomic policy and welfare state reform become order of
the day By featuring the ways that states adjust to new pressures this book s arguments may come in handy to those trying to
make sense of the crisis and the powers that drive the policy solutions **Environmental Finance and Development**
Sanja Tišma,Ana-Maria Boromisa,Ana Pavicic Kaselj,2012 This book presents an overview of five European national
environmental strategies and action plans with a strong focus on environmental financing There is particular focus on the
water waste and air sectors but these are analyzed in relation to other environmental protection measures at the national
and regional level including agriculture forestry regional development energy and transport This analysis of environmental
financing encompasses policy in three EU member states Bulgaria Romania and Slovenia and two states at
