Banking and Microfinance Institution Partnerships Don Chandima Padmaperuma, 2023-03-16 This book examines partnerships between commercial banks and microfinance institutions MFIs It demonstrates that when set up properly these partnerships have the potential to develop and enhance the financial inclusion agenda and further support sustainable development MFIs provide access to finance predominantly for those who are poor but economically active and therefore their expansion is imperative for inclusive economic development However MFIs are faced with enormous challenges The book discusses how partnering with a commercial bank can meet these challenges and the process of interaction contributing to the enhancement of institutional robustness of MFIs Through two distinct case studies in Cambodia and Australia the book discusses the motivations objectives and operational dynamics of a partnership as well as the challenges success factors and potential benefits from the increase in outreach and sustainability to the transference of knowledge and potential for capacity building Similarly the partnering banks benefit in line with the intended objectives commercial or social besides help embedding social consciousness and improving staff engagement Concluding with elucidating the characteristics of a partnership model that can succeed across different global contexts the book will interest a range of researchers and students across development economics banking finance and sustainable development

From Microfinance to Inclusive Finance R. H. Schmidt, H. D. Seibel, P. Thomes, 2016-09-19 Once praised as a panacea to overcome poverty microfinance has had to face harsh criticism because of painful failures and unfulfilled expectations Still many people in particular in rural regions do not have any access to formal financial services many microfinance institutions are weak and others rather exploit their clients driving them into over indebtedness than helping them out of poverty What should microfinance achieve Can it help to build up inclusive financial systems allowing access to basic financial services for everybody The historic templates for this book are the German Sparkassen and Cooperative banks that have a strong track record of development and growth spanning over 200 years For obvious reasons their results cannot be transferred directly into specific solution options to today's challenges in developing countries Nevertheless the coming into existence of Sparkassen and Cooperative banks can well be seen as part of a period of revolutionary developments in the European economic and social landscape which can be viewed as analogous to the transformation that emerging economies are undergoing today While Europe faced dramatically changing living conditions during the period of industrialization these newly created banks made change possible by unequivocally including the lower class population in the transformation by providing access to savings and loans And it is

this is parallel even in the face of the many differences which is why their development and success deserves careful consideration today The authors approach differs from other explorations by specifically adopting an interdisciplinary strategy They take into account past developments as well as current global ones from a historical social science and economic point of view Analysis and the interpretation of data is supported by case studies to illustrate their considerations The authors identify general parameters both for failure and for success and also indicate how to optimize existing potentials both for institutions and policy makers As a result of this interdisciplinary work the authors advance an inclusive stylised facts based model The will to build up institutions to adhere to corporate social responsibility and creating conducive legal frameworks form the basic conditions for success More specifically the guiding principles of these successful business models are a fair savings and credit policy the promotion of capital transfers without reference to class and gender a focus on business activities in a well defined region decentralized organizational structures combined with national networks which avoid regional capital drains and the securing of economies of scale and scope Last but not least is the centrality of objectives beyond that of the sheer maximisation of profits
