Smart Power An Urban Guide To Renewable Energy And Efficiency:

Smart Power William H. Kemp, 2004 Hundreds of ways for city dwellers and renters to save on energy costs **The Carbon Buster's Home Energy Handbook** Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook It provides answers to questions such as Which measure is more effective putting solar panels on your roof or buying a hybrid car Where do I need to invest first in high efficiency shower heads or solar tubes Is a 500 fridge that uses 800 kWh of power per year a good buy The book allows individuals to quickly and accurately assess which products are a good deal and which aren't It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns yielding results that are often surprising The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol At the same time readers implementing the recommendations will save an average of 15 000 in energy costs over the next five years **The Climate Diet** Jonathan Harrington, 2012-05-04 The atmosphere is getting fat on our carbon and other greenhouse gas emissions and it needs our help We live in a world of excess consuming too much of everything food clothes cars toys shoes bricks and mortar Our bingeing is often so extreme that it threatens our own health and wellbeing And we are not the only ones who are getting sick The Earth which provides the food air water and land that sustains us is also under severe pressure We either take steps to put our personal and planetary systems back into balance or we suffer the consequences So what does any unhealthy overweight person do when the doctor tells him or her that they are eating themselves into an early grave Go on a diet This is the must have guide to the most important diet ever explaining climate change concepts problems and solutions in ways that anyone can easily understand Following a six step climate diet plan families will be able to count their carbon calories and learn how to reduce them leaving us with a slim healthy planet now and for the future
