Smith, Hinchman & Grylls Thomas J. Holleman, James P. Gallagher, 1978 **Smith, Hinchman and Grylls** Thomas J. Holleman, **Smith, Hinchman and Grylls** Thomas J. Holleman, 1978-10 The story of Smith Hinchman Grylls Associates Inc is also the story of the building of Detroit and Michigan This long established and respected national firm has designed more of downtown Detroit s buildings than any other company while it has made a significant mark on architecture throughout the state The firm has been based in Detroit since 1855 but Thomas J Holleman and James P Gallagher trace its history to Sheldon Smith s early practice of architecture in Sandusky Ohio in 1853 making it the oldest continuously operating architectural and engineering practice in the United States More than 230 photographs of buildings renderings floor plans and documents in this volume illustrate the many remarkable achievements of Smith Hinchman Grylls over its 125 years The authors trace the history of three generations of Smith architects they describe the firm s incorporation the wide range of its engineering and architectural achievements and its expansion into a whole family of companies located in Ann Arbor Louisville Chicago Phoenix Washington Toronto Atlanta and Jeddah Saudi Arabia The practice grew from the days when its major commissions were fine residences small hotels and commercial blocks to the era of skyscrapers and manufacturing plants and finally to the era of multi building complexes space laboratories and solar collectors here and abroad Throughout its prestigious history the firm has demonstrated its readiness to meet any engineering and architectural challenge Its commissions are now located throughout the United States and in such distant locations as Scotland Saudi Arabia and Vietnam *Minoru Yamasaki* Dale Allen Gyure, 2017-01-01 Dale Allen Gyure traces the full career of midcentury American architect Minoru Yamasaki providing new insight into his unique style and his unfortunate fall from stardom in the later 20th century Designing Detroit Michael G. Smith, 2017-05-17 Shines a light on Detroit architect Wirt Rowland who until now has largely slipped into obscurity In the early 1900s Detroit was leading the nation in architectural innovation and designer Wirt Rowland was at the forefront of this advancement yet few are even aware of his substantial contribution to the evolution of architectural style It is widely believed that celebrated local architect Albert Kahn designed many of Detroit s structures such as the General Motors and First National Bank buildings In fact while Kahn s efforts were focused on running his highly successful firm it was Rowland his chief designer who was responsible for the appearance and layout of these buildings an important point in appreciating the contributions of both Kahn and Rowland During the early twentieth century Rowland devised a wholly new or modern design for buildings one not reliant on decorative elements copied from architecture of the past As buildings became more specialized for their intended use Rowland met the challenge with entirely new design methodologies and a number of improved technologies and materials that subsequently became commonplace Designing Detroit Wirt Rowland and the Rise of Modern American Architecture begins with a brief overview of Rowland s early life and career Author Michael G Smith goes on to analyze Rowland s achievements in building design and as a leader

of Detroit's architectural community throughout both World Wars and the Great Depression. The interdependence of architecture with the city's fluctuating economic prosperity and population growth is explored illuminating the conditions for good architecture and the arts in general. The author identifies the influence of Jay Hambidge's dynamic symmetry in Rowland's work and how it allowed him to employ color as a modern replacement for traditional ornamentation leading to the revolutionary design of the Union Trust Guardian Building for which he receives nearly unanimous praise in national media. This book is concerned primarily with Rowland's influence on Detroit architecture but spans beyond his work in Michigan to include the designer's broad reach from New York to Miami. A comprehensive appendix includes extensive lists of Rowland's publications, locations he had designed, and jobs taken on by his firm during his tenure. This book represents new research and insights not previously discussed in either scholarly or general audience texts and will be of interest to casual readers of Detroit history as well as architecture historians.

The Dodge Brothers Charles K. Hyde, 2005-04-08
Biography of John and Horace Dodge and the history of their company. At the start of the Ford Motor Company in 1903 the Dodge Brothers supplied nearly every car part needed by the up and coming auto giant. After fifteen years of operating a successful automotive supplier company, John and Horace Dodge again changed the face of the automotive market in 1914 by introducing their own car. The Dodge Brothers automobile carried on their names even after their untimely deaths in 1920 which led to its sale in 1925 to New York bankers and subsequent purchase in 1928 by Walter Chrysler. Hyde not only details the brothers' lives and influence on automotive manufacturing and marketing trends in the early part of the twentieth century but also their civic contributions to Detroit, their hiring of African Americans and women, and their often anonymous charitable contributions to local organizations. Despite their achievements and their critical role in the early success of Henry Ford, John and Horace Dodge are usually overlooked in histories of the early automotive industry but Hyde has put them front and center again to appropriately credit their lasting legacy.

The Guardian Building James W. Tottis, 2008
In *The Guardian Building*, James W. Tottis tells the story of the opulent block-long tower, the influential company that commissioned it, and the underappreciated architect responsible for its design. In full-color historic and contemporary photos, Tottis details everything from the china designed by the architect for use in the Guardian dining room to the building's rarely seen upper banking room. Tottis also investigates the sources of design and materials for the Guardian, finding that it brought together the finest artisans, craftsmen, and firms of the time, including Rookwood Pottery, Pewabic Pottery, Moline Furniture Works, architectural sculptor Joe Pardo, and muralist Ezra Winter.

Incorporating Architects Aaron Cayer, 2025
By the end of the twentieth century, US architecture and engineering firms held more capital than entire countries, employed more people than were housed in most cities, and rented offices in more nations than comprised the UN. Within them, architects were designing not single buildings but urban systems, including the multinational infrastructures, legal codes, and financial mechanisms on which those systems came to depend. However, despite the extraordinary power of these architects, their

histories remain shrouded in myth and concealed by design This forensic analysis traces a history of architects at one such firm AECOM as they assembled their own multinational corporation and embedded themselves in the operations of American empire after World War II shielding themselves from the instabilities of a postwar political economy Incorporating Architects reveals how architects through their businesses more than their drawings or buildings modulated the political economy gripped the reins of their profession and produced the global injustices that define our neoliberal present
