Lies Rachelle M. Smith, 2022-01-11 This encyclopedia examines the phenomenon of deception from a variety of perspectives and in a multitude of contexts It offers readers an accessibly written and engaging resource that sheds light on when why and how we lie Ironically it seems to be a universal truth that everyone lies From innocent white lies to elaborate deceptions humans appear to be hard wired for dishonesty But what psychological or evolutionary purpose does lying serve What motivates us to lie and what effects do such lies have on those around us and on our own physiology and mental health What are the differences between types of lies and how do various forms of dishonesty manifest themselves in such areas as politics advertising and social media And perhaps most importantly how can we spot liars in our everyday lives and encourage those around us and even ourselves to be more honest

Lies The Science behind Deception provides a broad and multifaceted introduction to this fascinating topic More than 175 entries address the many forms of lying the purpose and development of such behaviors and their consequences It also includes practical sidebars that help readers to deal with lying and liars in their own lives

Crimes That Changed Our World Paul H. Robinson, Sarah M. Robinson, 2018-06-15 Can crime make our world safer Crimes are the worst of humanity's wrongs but oddly they sometimes trigger improvement in our lives *Crimes That Changed Our World* explores some of the most important trigger cases of the past century revealing much about how change comes to our modern world The exact nature of the crime outrage reform dynamic can take many forms and Paul and Sarah Robinson explore those differences in the cases they present Each case is in some ways unique but there are repeating patterns that can offer important insights about what produces change and how in the future we might best manage it Sometimes reform comes as a society wrestles with a new and intolerable problem Sometimes it comes because an old problem from which we have long suffered suddenly has an apparent solution provided by technology or some other social or economic advance Or sometimes the engine of reform kicks into gear simply because we decide as a society that we are no longer willing to tolerate a long standing problem and are now willing to do something about it As the amazing and often touching stories that the Robinsons present make clear the path of progress is not just a long series of course corrections sometimes it is a quick turn or an unexpected lurch In a flash we can suddenly feel different about present

circumstances seeing a need for change and can often just as suddenly do something about it Every trigger crime that appears in Crimes That Changed Our World highlights a societal problem that America has chosen to deal with each in a unique way But what these extraordinary and sometime unexpected cases have in common is that all of them describe crimes that changed our world *Smoke and Mirrors* Random House,1998-10-01 **Everyday Miracles** Burt,Dr. Richard Burt,2023-01-10 Describes the author s approach to treating such incurable diseases as multiple sclerosis and scleroderma using hematopoietic stem cell transplantation detailing the history of his patients who have found success with the treatment
