Sipri Yearbook 2000 Armaments Disarmaments And International Security:

SIPRI Yearbook 2000 Stockholm International Peace Research Institute, 2000 The 31st edition of the Yearbook analyses developments in 1999 in Security and conflicts Military spending and armaments Non proliferation arms control and disarmament with extensive annexes on arms control and disarmament agreements a chronology of security and arms control related events and a comprehensive glossary of terms and membership of international organizations **The NEBI YEARBOOK 2001/2002** P. Joenniemi, Lars Hedegaard, A. Östhol, Bjarne Lindström, K. Peschel, C.-E. Stalvant, 2013-03-09 Thorvald Stoltenberg President of the Norwegian Red Cross Chairman of the Editorial Advisory Board Despite the very optimistic language on the imminence of new accessions to the European Union that came out of the June 2001 European Council in Gothenburg it will serve no good purpose to neglect the fact that EU membership for the Central and Eastern European applicants remains a difficult process Painful experience makes it prudent to exercise caution in predicting developments within the European Union Negotiations may drag out snags may appear and something may happen on the way to ratification So perhaps it is wise to take a broader view of European integration and therefore integration within the North European Barents and Baltic Sea region that is the focus of this Yearbook EU membership for those countries that are able to satisfy the Copenhagen requirements and the chapters of the *acquis communautaire* that have subsequently been specified is certainly a prize worth fighting for But all is not lost if some of the applicants end up not joining the Union as a result of the current enlargement round Even more important than formal membership is the process of growing together that has taken place simultaneously with the membership negotiations We are dealing here with integration in the real world of trade investments division of labour politics environment hard and soft security people to people relations etc The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective **Realism versus Global Arms Control and Disarmament** Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging

the divide between international law and international relations scholarship

The International Arms Trade Rachel Stohl, Suzette Grillo, 2013-04-29 The multi billion dollar business of the international conventional arms trade involves virtually every country in the world Around the globe people s lives are being irrevocably changed by the effects of guns tanks and missiles These weapons have the potential to cause a deadly and current threat one responsible for hundreds of thousands of deaths a year This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade The first book on the subject in nearly a decade The International Arms Trade provides an engaging introduction to the trade the effects and the consequences of these weapons The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War In particular they assess the role of the largest arms exporters and importers the business of selling conventional arms around the world and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities The International Arms Trade will be invaluable for students and scholars of international relations and security studies and for policymakers and anyone interested in understanding more about the conventional arms trade

Changing Transatlantic Security Relations Jan Hallenberg, Håkan Karlsson, 2006-09-27 This new book shows how the idea of a strategic triangle can illuminate the security relationships among the United States the European Union and Russia in the greater transatlantic sphere This concept highlights how the relationships among these three actors may on some issues be closely related A central question also follows directly from the use of the notion of the triangle does the EU have actor capability in this policy sphere or will it get it in the future The reason this is so important for our project is that only if the Union is regarded by the two other actors and regards itself as an actor in security policy does the strategic triangle really exist Consequently this book has a strong focus upon the development of the actor capability of the Union In the case of the United States it examines to what extent the concept of the strategic triangle has significance under each of five grand strategies that serve as alternative visions of the superpower s role in the world

The Global Arms Trade Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade

International Relations Since the End of the Cold War Geir Lundestad, 2013 In International Relations Since the End of the Cold War many of the world s leading scholars examine the Cold War legacy The authors examine several key issues including the relationship

between democracy and peace the Cold War and the Third World superpowers the role of post Cold War nuclear weapons

The State in Myanmar Robert H. Taylor, 2009 Transforming East Asian Domestic and International Politics Robert Compton, 2020-09-10 This title was first published in 2002 This text attempts to bridge the gap between international relations and comparative politics with particular reference to East Asia The book begins with an exploration of the theme of globalization and the impact it has on the conduct of international relations and the process of domestic politics It discusses the fact that domestic actors are unable to assume an insular political environment as previously referring to the constant reception of stimuli which force adjustments to approaches in the conduct of domestic and international affairs Globalization's ubiquitous presence reflects a changed reality for both state and non state actors no policy maker can afford to ignore or underemphasize its role in shaping or altering the course of public *India as an Emerging Power* Sumit Ganguly, 2004-11-23 These essays examine India's relations with key powers including the Russian Federation China and the USA and with key adversaries in the global arena in the aftermath of the Cold War One positive relationship is that of India's relations with Israel since 1992 **Nuclear Commerce** Thomas Berndorfer, 2009 Peaceful and non peaceful applications of nuclear technologies share a common fate one cannot exist without the other As the world is about to experience a nuclear renaissance the nuclear industry has gone through a phase of consolidation Despite more efficient intra industry structures and technological advancements it will still not be able to close the increasing gap in energy demand to be expected in the near future The economic attractiveness and relative absence of emissions still make atomic power an attractive candidate for an energy mix comprising several different clean technologies A renewed interest in nuclear energy will at the same time demand for a robust non proliferation framework as a safety guarantee for the market Export controls have been found to be an effective tool in this regard The Zangger Committee as the legitimate interpreter of the Non Proliferation Treaty and the Nuclear Suppliers Group representing the most influential countries in nuclear commerce have established a system of checks and balances that may not halt proliferation altogether but which has managed to slow it down significantly The effect of these control structures on the development of the nuclear market cannot be assessed directly Political and security concerns particularly attributed to nuclear matters make their application a necessity for the existence of the commerce itself Recent global efforts such as the United Nations Security Council Resolutions 1540 and 1673 are focusing on the implementation of common set of key elements for strategic trade controls The success of these measures will have a direct impact on the sustainability of the nuclear renaissance Sino-American Relations R. Sinha, 2003-06-10 Presenting a trenchant critique of America's political culture and its China policy Radha Sinha explains the reasons for the mismatch between professed American values and the practice of statecraft by the American power elite He examines the ways in which their relentless search for enemies has led the United States to violate the norms of international law at will thus causing increasing disenchantment sometimes bordering on hatred The Economics of the Global Defence Industry Keith

Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to our knowledge of the world's major defence industries. Experts from a wide range of different countries from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of structure includes discussions of entry conditions, domestic monopoly, oligopoly structures and opportunities for competition. The section on conduct analyses price, non-price competition, including private and state-funded R D and performance, incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

The Politics of Collective Violence Charles Tilly, 2003-03-17 Are there any commonalities between such phenomena as soccer hooliganism, sabotage by peasants, of landlords, property incidents of road rage and even the events of September 11? With striking historical scope and command of the literature of many disciplines, this book, first published in 2003, seeks the common causes of these events in collective violence. In collective violence, social interaction immediately inflicts physical damage, involves at least two perpetrators of damage and results in part from coordination among the persons who perform the damaging acts. Professor Tilly argues that collective violence is complicated, changeable and unpredictable in some regards, yet that it also results from similar causes variously combined in different times and places. Pinpointing the causes, combinations and settings helps to explain collective violence and its variations and also helps to identify the best ways to mitigate violence and create democracies with a minimum of damage to persons and property.

The Use of Nuclear Weapons and the Protection of the Environment during International Armed Conflict Erik V. Koppe, 2008-04-25 In 1996 the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons, it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict. The present work analyses this conclusion, focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment. Although the use of weaponry during armed conflict is usually related to the protection of individuals, the rapidly emerging appreciation of and the worldwide realization of the intrinsic

value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the illegality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under *ius in bello* *ius ad bellum* and *ius pacis* Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

The Middle East's Relations with Asia and Russia Hannah Carter, Anoushiravan Ehteshami, 2013-01-11 Carter and Ehteshami consider the significant geopolitical economic and security links between the Middle East and the wider Asian world links which are often overlooked when the Middle East is considered in isolation or in terms of its relations with the West but which are of growing importance Topics covered include Asia's overall geostrategic realities and the Middle East's place within them relations between the Middle East and China Russia central Asia southeast Asia and south Asia Islam in central Asia and southeast Asia and the connections with the Middle East and the important links between the Middle East and India and Pakistan's military and security establishments

Technology and Security in the 21st Century Amitav Mallik, 2004

Humanizing Our Global Order Ivan L. Head, 2003-01-01 Hunger disease poverty environmental insecurity illegitimate governance civil war and international conflict are only a few of the causes of today's global turmoil and gross human suffering Written in honour of Ivan Head foreign affairs advisor to former Prime Minister Pierre Trudeau past president of Canada's International Development Research Centre and professor emeritus of International law at the University of British Columbia this collection of distinguished essays addresses the imperative to enhance human dignity and protect human life by humanizing our global order and improving international relations goals Professor Head strove for throughout his career The authors argue that the search for possible solutions to these challenges which has so far tended to proceed without due recognition of the needs demands and solutions that emanate from the geopolitical South must in future be conducted with alternate visions that take these factors into account Each essay seeks to reassess and reimagine a specific topic that relates in some significant way to our current global circumstance in ways that advance the book's thematic With essays grappling with such issues as Multilateral Environmental Agreements the Use of Force the Prevention of Civil War through Minority Protection Common Heritage of Humankind and the Civil Dimensions of Strategy the volume deals with a range of diverse topics that are as crucial as they are topical

Thinking Peaceful Change Frank Möller, 2007-02-09 Frank Möller explores why the states and societies of the Baltic Sea region have not yet evolved into a security community despite the area undergoing since the mid 1980s considerable change with little turmoil This book focuses on the tensions resulting from policies in the Baltic states aiming at an increase in both security and sovereignty Möller shows how these states' attempts at increasing their security were intricately bound up with their efforts at autonomous nation state building Möller argues that a

primary obstacle to security community building was the construction of nation states based upon an exceedingly traditional template emphasizing the connection between the state sovereignty and military security The Baltic states aspired to NATO membership amid unique challenges such as the perceived threat of renascent Russian imperialism and the perseverance of a collective memory emphasizing anti Soviet resistance M ller also examines such key issues as the demise of the Soviet Union the nonviolent withdrawal of Russian troops from the Baltic states and U S foreign policy in northern Europe Here is a profound multifaceted look at issues of security in the contemporary world a crucial tool for researchers and students of peace and conflict studies
