Vulnerable Consumers and the Law Christine Riefa, Severine Saintier, 2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice through the contributions of prominent authors academic practitioners and consultants in the field of consumer law and access to justice It demonstrates that despite the development of ADR access to justice is still severely lacking for the vulnerable consumer The book highlights that a broad understanding of access to justice which encompasses good regulation and its public enforcement is an essential ingredient alongside access to the mechanisms of traditional private justice courts and ADR to protect the vulnerable consumer Indeed many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones In addition because it may contribute to pushing already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy New technologies could provide solutions The book concludes with a plea for developing inclusive justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves This book will be suitable for both students and practitioners and all those with an interest in the justice system

Courts, Justice, and Efficiency Hector

Fix-Fierro,2004-01-06 This study explores the socio legal context of economic rationality in the legal and judicial systems It examines the meaning and relevance of the concept of efficiency for the operation of courts and court systems seeking to answer questions such as in what sense can we say that the adjudicative process works efficiently What are the relevant criteria for the measurement and assessment of court efficiency Should the courts try to operate efficiently and to what extent is this viable What is the proper relationship between efficiency and justice considerations in a judicial proceeding To answer these questions a conceptual framework is developed on the basis of empirical studies and surveys carried out mainly in the United States Western Europe and Latin America Two basic ideas emerge from it First economic rationality has penetrated the legal and judicial systems at all levels and dimensions from the level of society as a whole to the day to day operation of the courts from the institutional dimension of adjudication to the organizational context of judicial decisions Far from being an alien value in the judicial process efficiency has become an inseparable part of the structure of expectations we place on the legal system Second economic rationality is not the prevalent value in legal decision making as it is subject to all kinds of constraints local conditions and concrete negotiations with other values and interests

Law and the Market Economy in China Perry Keller,2017-07-05 This volume concerns several aspects of China s changing market based economy These include commercial contract enforcement corporate structures competition law and other issues related to China s membership in the WTO In the past two decades the rapid integration of China s economy into the global marketplace has created obligations and expectations of non discrimination and regulatory transparency in domestic markets The Chinese government has responded by demanding better governance within major companies market sectors and public administration generally However as the articles in this volume show it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance It has also moved cautiously in creating legal controls over unfair competition Moreover the protection of state owned enterprises which serve as vehicles for domestic economic social and political policy has been a recurring issue in China s WTO trade disputes
