Living Things Judith Harries, 2022-11-24 The 50 Fantastic Ideas series is packed full of fun original skills based activities for Early Years practitioners to use with children aged 0-5. Each activity features step by step guidance, a list of resources and a detailed explanation of the skills children will learn. Creative, simple and highly effective, this series is a must have for every Early Years setting. The ideas in this book will enable children to experience the delights of watching animals and plants grow, sharing and caring for pets, observing a variety of life cycles, surveying different minibeasts and finding out how to help vulnerable wild animals like hedgehogs. Linked to the Understanding the World section of the EYFS framework, this book includes ideas for games, creative activities, role play and hands on experiences with animals and plants to build children's empathy and encourage respect for living things both in their own environments and further afield. **The Little Book of Small World Play** Sharon Ward, 2015-06-04 Small world play activities provide opportunities for learning both indoors and outdoors. Play activities help children learn with both enjoyment and challenge. All the activities in this book can be adapted to suit your setting and the topics you are covering. Collecting your own resources for the activities and exploring them with your children will give as much pleasure as using them in adult directed activities. *It's a Small World After All* Jesper Leonard Vun, 2021-06-14 Experts say that a pandemic like the Spanish flu happens once in a century. Well, time's up! In December 2019, the world witnessed the emergence of a new pathogen that brought it to a standstill. The novel Coronavirus outbreak was declared a pandemic and governments worldwide executed unprecedented measures to contain it. The impact on life was devastating. Overnight, people became more aware of self hygiene and the importance of social distancing. However, many are still left in the dark when it comes to the why. This book introduces the basics of Microbiology, covering essential concepts that answer burning doubts: What are microorganisms? How do infection and disease occur? Should I be vaccinated? What is the difference between bacteria, viruses, protozoa and fungi? How can I protect myself against harmful agents? Besides, it aims to bring about a renewed outlook and appreciation of life through the many food for thought incorporated in the writing. This book is timely as there is an urgency for the public to understand the microscopic world and timeless because what is learnt today helps us better prepare for the future. After all, it's a small world where micro dictate macros. **Small World, Big Ideas** Satish Kumar, 2022-03-01 Small World Big Ideas collects twelve of the most inspiring and courageous activists together to share their stories and present an inspiring vision of what each of us can do to build a better world today. There's an activist in all of us and you don't have to shout about it to be heard. And to prove it, life-long campaigner and former Jain monk Satish Kumar has invited twelve of those activists he most admires to share their own inspiring stories in Small World Big Ideas, revealing some for the very first time who or what made them want to change the world and what kind of world they want to help create. This book collects the thoughts, hopes and visions of some of the most significant figures in the global fight for a better and more compassionate world. As well as Satish Kumar, we hear from Deepak Chopra. The mind-body healing pioneer discusses his journey from growing up in post-war India to learning about

Ayurvedic medicine to his current work promoting spiritual knowledge and working for world peace Jane Goodall The renowned scientist and conservationist tells of the people who have inspired her in her work to protect animals and the reasons she has for hope in the future Franny Armstrong The McLibel filmmaker writes about her politicisation as a teenager her involvement with the Greenpeace movement and the next steps in the fight against climate change Bob Brown The Australian Green politician shares stories from his time as an ecologist and lawmaker and his belief in how democracy can be used to bring people together to fight the looming crises facing Planet Earth Tim Flannery The explorer and ecologist tells of watching the ecosystems around him disappear his travels to remote areas around the world and how the only hope for our future lies in connecting with others to act together Polly Higgins The late environmental lawyer discusses how the concept of Earth Law and how she came to fight for ecocide to be recognised as a crime against humanity Caroline Lucas England's only Green MP Lucas writes about how she has fought all her life to change the political system and how radical change is always possible Bill McKibben The writer and activist discusses moving from writing to political campaigning and how he founded 350.org the global grass roots organization that works to halt and reverse climate change Carlo Petrini The slow food advocate tells of growing up in Piedmont and of how we can change the world by putting food back at the centre of our lives Vandana Shiva The ecofeminist discusses how the multiple crises which she has fought climate change misogyny and inequality are all interlinked and how our response must be similarly all encompassing Whether they have championed the tragic plight of Indian farmers impoverished by the domination of the agro giants or shamed Hollywood into treating climate change as a serious concern these are the people who have made their voices heard Their illuminating and often moving life stories will inspire all of us to get off the couch and do something ourselves to help shape a better world

Biology For Dummies Rene Fester Kratz, 2017-03-06 The ultimate guide to understanding biology Have you ever wondered how the food you eat becomes the energy your body needs to keep going The theory of evolution says that humans and chimps descended from a common ancestor but does it tell us how and why We humans are insatiably curious creatures who can't help wondering how things work starting with our own bodies Wouldn't it be great to have a single source of quick answers to all our questions about how living things work Now there is From molecules to animals cells to ecosystems Biology For Dummies answers all your questions about how living things work Written in plain English and packed with dozens of enlightening illustrations this reference guide covers the most recent developments and discoveries in evolutionary reproductive and ecological biology It's also complemented with lots of practical up to date examples to bring the information to life Discover how living things work Think like a biologist and use scientific methods Understand lifecycle processes Whether you're enrolled in a biology class or just want to know more about this fascinating and ever evolving field of study Biology For Dummies will help you unlock the mysteries of how life works
