## **Soviet Armed Forces 1918 1992 A Research Guide To Soviet Sources:**

*The Soviet Armed Forces, 1918-1992* John Erickson, Ljubica Erickson, 1996-02-06 In a compact guide to essential sources this bibliography covers the Soviet armed forces from the birth of the Red Army and the origins of the Soviet military system to the demise of the Soviet Union The authors have selected over 1 400 titles that accommodate both wider interests and those of the specialist Taking accessibility into account they have provided a wealth of information on sources available in the West The bibliography opens with a section on reference sources and the imperial antecedents to the Soviet system Part Two includes chapters on the Revolution and Civil War the period from 1922 1940 and the Great Patriotic War of 1941 1945 In the concluding section the authors cover the postwar period The final chapter Breakthrough Books includes those works that have radically influenced the perception and discussion of Soviet military affairs [A History Of Russia Volume 2](#) Walter G.

Moss, 2004-10-01 Moss has significantly revised his text and bibliography in this second edition to reflect new research findings and controversies on numerous subjects He has also brought the history up to date by revising the post Soviet material which now covers events from the end of 1991 up to the present day This new edition retains the features of the successful first edition that have made it a popular choice in universities and colleges throughout the US Canada and around the world

**The Russian Revolution and Civil War 1917-1921** Jonathan Smele, 2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature The Russian Revolution and Civil War 1917 1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state

*Historical Dictionary of World War II* Anne Sharp Wells, 2013-12-24 This dictionary covers the complex and costly conflict that began when Germany ruled by Adolf Hitler and the Nazi Party invaded neighboring Poland on 1 September 1939 and concluded when Germany surrendered on 7 9 May 1945 leaving much of the European continent in ruins and its population devastated The war against Germany Italy and the other European Axis members was fought primarily in Europe the Mediterranean the Middle East East and North Africa and the Atlantic Ocean The Axis powers were defeated by the Allies led by the Grand Alliance of Great Britain the United States and the Union of Soviet Socialist Republics The Historical Dictionary of World War II The War against Germany and Italy relates the history of this war through a chronology an introductory essay maps and photos and an extensive bibliography The dictionary section has more than 300 cross referenced entries on the countries and geographical areas involved in the war as well as the nations remaining neutral wartime alliances and

conferences significant civilian and military leaders and major ground naval and air operations This book is an excellent access point for students researchers and anyone wanting to know more about World War II [Air University Library Index to Military Periodicals](#) ,1997

**Russia and Armed Persuasion** Stephen J. Cimbala,2001 In *Russia and Armed Persuasion* Stephen J Cimbala argues that Russia s war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty first century Russia must master the use of force for persuasion not just destruction As the author shows military persuasion requires that Russian leaders master the politico military complexity of crisis management deterrence and arms control and the limitation of ends and means in war Russia now has scarce resources to devote to defense and can no longer afford the stick only diplomacy and strategy that have characterized some of its recent past Russian and Soviet military thinking historically emphasized the blunderbuss and total war overwhelming mass firepower and conflicts of annihilation or prolonged attrition However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management deterrence and limited war Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century According to the author the first decades of this century will pose at least three immediate challenges to Russia s military persuasion Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re starting the Cold War by means of an ill considered race in missile defenses Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia s nuclear deterrent Third Russia must develop forces that are more flexible in small wars and peace operations its recent experiences in Chechnya show that it has a long way to go in using economy of force as a military persuader Cimbala s original analysis demonstrates the similar features in apparently dissimilar or even opposite events and processes For example he shows how the problem of military persuasion applies equally to the challenge of managing a nuclear crisis and the problem of low intensity war In each case the dilemma is calibrating the military means to the political ends Controversially the author argues against both military and academic traditionalists contending that the complexity of the force policy relationship in the next century will reward the subtle users of military power and that others will be subject to a Gulliver effect of diminishing returns [Red Army Handbook, 1939-45](#)

Steve Zaloga,Leland S. Ness,1998 Although the Red Army won lasting fame in 1945 by defeating the Nazis there is a glaring lack of published material available about it This book takes a look at the historical background of the Red Army its major developments and organizational structures combat arms and equipment The authors discuss the higher level organizations to explain the differences in terminology between the Soviet and Western armies concluding with a detailed bibliography and
